### **Scholars in the Marketplace. The Dilemmas of Neo-Liberal Reform at Makerere University, 1989-2005**

Mahmood Mamdani, 2007 Scholars in the Marketplace is a case study of market based reforms at Uganda's Makerere University With the World Bank heralding neoliberal reform at Makerere as the model for the transformation of higher education in Africa it has implications for the whole continent At the global level the Makerere case exemplifies the fate of public universities in a market oriented and capital friendly era The Makerere reform began in the 1990s and was based on the premise that higher education is more of a private than a public good Instead of pitting the public against the private and the state against the market this book shifts the terms of the debate toward a third alternative than explores different relations between the two The book distinguishes between privatisation and commercialisation two processes that drove the Makerere reform It argues that whereas privatisation the entry of privately sponsored students is compatible with a public university where priorities are publicly set commercialisation financial and administrative autonomy for each faculty to design a market responsive curriculum inevitably leads to a market determination of priorities in a public university The book warns against commercialisation of public universities as the subversion of public institutions for private purposes

*Postgraduate Research Engagement in Low Resource Settings* Atibuni, Dennis Zami, 2019-09-27 The general academic progression and particularly research engagement of postgraduate students is characterized by various problems such as high dropout rates longer completion times low graduation rates and high repetition or retake rates This means that there are far fewer students pursuing postgraduate studies at tertiary institutions and universities than there are at the lower levels of education Yet there is growing demand for postgraduate education given its strong projected association with socioeconomic transformation at national and international levels among developed and developing countries alike *Postgraduate Research Engagement in Low Resource Settings* sets out to garner strategies for fostering efficiency of research conduct among the students and faculty so as to enhance high quality output for the envisaged personal societal national and international socioeconomic transformation Covering a range of topics such as intellectual property mental health and quality assurance this book is ideal for research supervisors higher education faculty librarians educators administrators researchers academicians and students
