A Guide to Practicing David Popper's 'Hohe Schule' Etudes Benjamin Whitcomb, 2018-08-31 There are few works in the cello repertoire as significant as the etudes by David Popper They are practiced studied and learned by cellists all over the world as a sort of rite of passage to the advanced cello techniques This has been the case since their publication and there is no sign that this is going to change in the foreseeable future Auditions for such things as youth orchestras festivals competitions or university admissions frequently require the performance of one or more Popper etudes Learning these etudes is a wonderful way to prepare yourself for the advanced cello repertoire However tackling them on your own can be a daunting task Several authors have published their ideas and suggestions for practicing these etudes whether as articles books or videos What makes this guide

different is that it shows you step by step exactly how you can effectively practice all the difficult spots in each etude such that you will surely learn and master each one at a faster rate than you would without these suggestions and exercises

Beach,2023-10-27 Disability and Motor Behavior A Handbook of Research provides the first focused review of research and scholarship pertaining to individuals with disabilities across motor behavior related disciplines e g motor learning motor control motor development The book consists of 15 chapters that highlight current research trends future research directions and practical implications spanning different types of disability The book takes a holistic view toward motor behavior among persons with disabilities from an empirical perspective This book is written at a level appropriate for graduate students and researchers and will be the first book to provide in depth discussions about research and scholarship across motor behavior Snapshots of

Museum Experience Elee Kirk,Will Buckingham,2018-06-20 Children are one of the major audiences for museums but their visits are often seen solely from the point of view of museum learning In Snapshots of Museum Experience Will Buckingham draws upon Elee Kirk s research amongst child visitors to the Oxford University Museum of Natural History to take a different approach Using a method of photo elicitation with four and five year old child visitors to the museum the book investigates children s experience of the museum and in the process undermines many of our assumptions about the interests needs and demands of child museum visitors Drawing together the fields of museum studies and childhood studies the book considers children as active creators of the museum visit It investigates the way that children navigate and take control of the physical and social spaces of the museum finding their own idiosyncratic pathways through these spaces It also explores how elements of the museum light up becoming salient to the child visitor Finally it investigates how children make sense through intellectually and imaginatively engaging with these elements of the museum visit Snapshots of Museum Experience gives a unique insight into the sheer diversity of children s museum experiences and discusses how museums might cater more successfully to the needs of their child visitors As such it should be of great interest to academics researchers and

students in the fields of museum studies visitor studies and childhood studies It should also be essential reading for museum educators and exhibition designers

Special Kids for Special Treatment? Helen Phtiaka, 2018-09-03 First published in 1997 This book compares and contrasts the experiences of deviant pupils in a mainstream school with that of those in a special unit for pupils with behavioural problems The author's aims are to i evaluate the differences between the behaviour of deviant boys and girls within the mainstream education system with those without and ii justify the criteria for transferring deviant pupils to special units Her research shows that there is no uniformity in the deviant behaviour of pupils in either situation In fact there are more similarities in the behaviour of pupils across the dividing line than pupils in the same institution Such findings raise questions about the apparent arbitrary nature of some transferral decisions and in the longer term the whole logic of separate schooling for pupils who are considered by some to be a problem At a time when market forces and competition have distracted the schools attention away from the needs of the individual pupil this book stresses the need for changes at all levels which will make school relevant to the lives of all pupils
