management of the air traffic safety and security of UAS are sure to influence the development of regulations for civil UAS The book will be welcomed by aviation regulators interested international and regional organisations research organisations aviation lawyers and academics in international law and air law Australian National Bibliography: 1992 National Library of Australia,1988 Perspectives in Business Informatics Research Janis Grabis,Marite Kirikova,2011-10-07 This book constitutes the refereed proceedings of the 10th International Conference on Perspectives in Business Informatics Research BIR held in Riga Latvia in October 2011 The 25 full papers accepted for this volume were selected from 68 submissions In addition two invited papers presented at the conference are also included The papers have been organized in topical sessions on business intelligence and performance management data and processes ontologies architectures stakeholders perspectives Web information systems and services and systems approach **Enterprise Resource Planning: Global Opportunities and Challenges** Hossain, Liaquat,Patrick, Jon David,Rashid, Mohammad A.,2001-07-01 Enterprise Resource Planning ERP refers to large commercial software packages that promise a seamless integration of information flow through an organization by combining various sources of information into a single software application and a single database The outcome of ERP itself is still a mystery but the trends and issues it has created will be the enigma that future generations will have to solve Traditionally separate units were created within an organization to carry out various tasks and these functional areas would create their own information systems thereby giving rise to systems that were not integrated ERP strives to provide a solution to these problems Enterprise Resource Planning Solutions and Management examines the issues that need to be further studied and better understood to ensure successful implementation and deployment of ERP systems

Software Measurement Andrzej Kobyliński,Beata Czarnacka-Chrobot,Jaroslav Świerczek,2015-09-24 This book constitutes the refereed proceedings of two joint events the 25th International Workshop on Software Measurement IWSM and the 10th International Conference on Software Process and Product Measurement Mensura referred to as IWSM Mensura 2015 and held in Krak w Poland in October 2015 Software measurement is a key methodology in estimating managing and controlling software development and management projects The 13 papers presented in this volume were carefully reviewed and selected from 32 submissions They present various theoretical and empirical results related to software measurement and its application in industrial projects *Agile Service Development* Marc Lankhorst,2012-04-23 Economies around the globe have evolved into being largely service oriented economies Consumers no longer just want a printer or a car they rather ask for a printing service or a mobility service In addition service oriented organizations increasingly exploit new devices technologies and infrastructures Agility is the ability to deal with such changing requirements and environments Agile ways of working embrace change as a positive force and harness it to the organization s competitive advantage The approach described in this book focuses on the notion of a service as a piece of functionality that offers value to its customers Instead of solely looking at agility in the context of system or software development agility

is approached in a broader context The authors illustrate three kinds of agility that can be found in an agile enterprise business process and system agility These three types of agility reinforce each other and establish the foundation for the agile enterprise Architecture patterns models and all of the best practices in system development contribute to agile service development and building agile applications This book addresses two audiences On the one hand it aims at agile and architecture practitioners who are looking for more agile ways of working in designing and building business services or who are interested in extending and improving their agile methods by using models and model based architectures On the other hand it addresses students of enterprise architecture and software development or service science courses both in computer science and in business administration
