Olve Jan Roy and Magnus Wetter Since the groundbreaking work of Robert S Kaplan and David P Norton the concept of the  
Balanced Scorecard has achieved increasing popularity in the business world Previously many organizations had built their

authors draw on their extensive experience with scorecard projects to provide a step by step method for introducing the  
Balanced Scorecard into an organization This is done through the use of some of the most important practical examples in  
existence with case studies from ABB Coca Cola Electrolux British Telecom Nat West Skandia and Volvo The desired  
strategic control system using scorecards that is presented focuses on creating and communicating a total comprehensive  
picture to all members of the organization from the top down a long term view of what the company s strategic objectives  
really are how to make use of knowledge gained through experience and the required flexibility of such a system to cope with  
the fast changing business environment This book will provide senior and operational managers consultants and business

The Impact of Management Control Systems on Employees' Behavior During Remote Work Lena Heinz-Schmitt, 2024-03-23 The new trend towards flexible work environments has spurred the debate over the effects of remote work on employees behavior and has forced greater consideration of how management control systems must be adjusted to meet the needs of the new work environment While the existing literature has observed several positive behavioral changes such as increased performance and effort counterproductive work behavior has also been identified Combining an experimental and a case study research approach the present study investigates whether a management control system can mitigate unwanted behavior during remote work The experimental study manipulates the use of management controls and analyzes the effects of an enabling vs a coercive management control system on dishonest behavior The data reveal that individuals who perceive the system as enabling and feel a connection to the company behave more honestly during remote work The organizational connection entirely mediates the perception of the management control system on dishonest behavior To further investigate this effect a case study approach was applied Based on interviews several factors are identified that might impact the enabling perception of the control system in remote work settings The six factors are divided into situational and individual attributes
