Subject Guide to Books in Print, 1996 **Forthcoming Books** Rose Army, 2003 *Management with Online Study Tools 12 Months* Danny Samson, Timothy Donnet, Richard L. Daft, 2017-10-25 Samson Daft Donnet's Management is a robust foundation text providing a balance of broad theoretical content with an engaging easy to understand writing style. It covers the four key management functions: planning, organising, leading, and controlling, conveying to students the elements of a manager's working day. Along with current management theory and practice, the authors integrate coverage of innovation, entrepreneurship, agile workplaces, social media, and new technology throughout. This sixth edition features a new author on the team and contains updates to content based on recent research. Real-life local and international examples showcase the ongoing changes in the management world. Focusing on a skills approach, they bring concepts to life for students, supporting motivation, confidence, and mastery. Each part concludes with a contemporary continuing case study focusing on car company Toyota as it faces managerial challenges and opportunities in the region.

Leading Value Creation M. Barney, 2013-12-18 Every business discipline has a unique vantage point on value creation and destruction, and while specialists have devised solutions, leaders rarely use them because of the inherent complexity in trying to understand which parts fit together to help them achieve goals. The result is a sort of business Tower of Babel for practicing leaders and organizational scientists alike. Leading Value Creation fills this void as the first book to take organizational science and place it into one coherent and useful model. Barney integrates vastly different areas of organizational science into his Cue See Model, which builds upon his experience developing global leaders at companies like Motorola, Merck, and Infosys. The model is a way to help leaders better create value and mitigate risk. It highlights the flow of value across four perspectives: quality, cost, quantity, and cycle time, and also looks across levels of analysis for a holistic view on the bottlenecks to value creation as the best focal point for organizations to succeed. Barney provides numerous practical examples from pharmaceuticals to barbershops and summarizes six empirical studies demonstrating the model's usefulness.
