Wu,2006-02-20 Have you tried using an automated GUI testing tool only to find that you spent most of your time configuring
adjusting and directing it This book presents a sensible and highly effective alternative it teaches you to build and use your
own truly automated tool The procedure you ll learn is suitable for virtually any development environment and the tool allows
you to store your test data and verification standard separately so you can build it once and use it for other GUIs Most if not
all of your work can be done without test scripts because the tool itself can easily be made to conduct an automatic GUI
survey collect test data and generate test cases You ll spend virtually none of your time playing with the tool or application
under test Code intensive examples support all of the book s instruction which includes these key topics Building a C API text

Keyword Extractor and Document Classifier: Emerging Research and Opportunities* Paul, Dimple Valayil,2021-01-08 The
main problems that prevent fast and high quality document processing in electronic document management systems are
insufficient and unstructured information information redundancy and the presence of large amounts of undesirable user
information The human factor has a significant impact on the efficiency of document search An average user is not aware of
the advanced option of a query language and uses typical queries Development of a specialized software toolkit intended for

information systems and electronic document management systems can be an effective solution of the tasks listed above Such toolkits should be based on the means and methods of automatic keyword extraction and text classification The categorization or classification of texts into predefined categories has witnessed a booming interest in the last 10 years due to the increased availability of documents in digital form and the ensuing need to organize them Thus research on keyword extraction advancements in the field and possible future solutions is of great importance in current times Developing a Keyword Extractor and Document Classifier Emerging Research and Opportunities presents an information extraction mechanism that can process many kinds of inputs realize the type of text and understand the percentage of the keywords that has to be stored This mechanism then supports information extraction and information categorization mechanisms This module is used to support a text summarization mechanism which leads with the help of the keyword extraction module to text categorization It employs lexical and information retrieval techniques to extract phrases from the document text that are likely to characterize it and determines the category of the retrieved text to present a summary to the users This book is ideal for practitioners stakeholders researchers academicians and students who are interested in the development of a new keyword extractor and document classifier method
