**Languages** Jason Kandybowicz,Harold Torrence,2017-07-10 Relatively little is known about Africa s endangered languages

Unlike indigenous languages in Australia North Asia and the Americas which are predominantly threatened by colonizers

African languages are threatened most immediately by other local languages As a result the threat of language extinction is

perceived as lower in Africa than in other parts of the globe and a disproportionate amount of research is devoted to the

study of endangered African languages when compared to any other linguistically threatened region in the world There are

approximately 308 highly endangered languages spoken in Africa roughly 12% of all African languages and at least 201

extinct African languages This volume hopes to illuminate and challenge this trend Chapters offer both documentary and

theoretical perspectives emphasizing the symbiotic relationship between the two approaches and its implications for the

preservation of endangered languages both in the African context and more broadly Documentary oriented chapters deal

with key issues in African language documentation including language preservation and revitalization community activism

and data collection and dissemination methodologies among others Theoretically oriented chapters provide detailed

descriptions and analyses of phonetic phonological morphological syntactic and semantic phenomena and connect these to

current theoretical issues and debates Africa s Endangered Languages provides thorough coverage of a continent s neglected

languages that will spur linguists and Africanists alike to work to protect them      *Revenue Administration* National
