Dispossessed Nick Buxton, Ben Hayes, 2015-11-20 While the world's scientists and many of its inhabitants despair at the impact of climate change corporate and military leaders see nothing but opportunities For them melting ice caps mean newly accessible fossil fuels borders to be secured from climate refugees social conflicts to be managed and more failed states in which to intervene They are securing their assets at the expense of the planet and its inhabitants The Secure and the Dispossessed looks at these deadly approaches with a critical eye It also considers the flip side that the legitimacy of the elite is under unprecedented pressure from resistance by communities to resource grabs to those creating new ecological and socially just models for managing our energy food and water Topics covered include geoengineering militarism refugee protection greenwashing and the agricultural crisis among others Adaptation and resilience to a climate changed world is desperately needed but the form it will take will affect all of our futures Peace and Prosperity through World Trade

Jean-Pierre Lehmann, Fabrice Lehmann, 2010-09-30 The International Chamber of Commerce ICC was created in 1919 by business leaders who described themselves as merchants of peace and whose motto was world peace through world trade Since then a number of initiatives including the founding of the WTO in 1995 have provided the proper regulatory conditions for a dramatic increase in world trade This has generated unprecedented growth and allowed many countries to enjoy great gains in wealth and welfare Yet despite these gains we are still far from achieving the ICC's goal of world peace through world trade This 2010 book provides a broad overview of the forces that shape international trade and global interdependence showing business leaders and entrepreneurs how we can address the shortcomings of the multilateral trading system Most importantly it shows how we can turn international trade into one of the key global instruments to achieve peace and prosperity in the twenty first century **Forecasting China's Future**

Roger Irvine, 2015-06-26 China's future development is likely to have a huge impact on twenty first century global outcomes It is therefore surprising that thus far so little attention has been given to comparing and evaluating expert forecasts of China's future in the post Mao era This book presents an illuminating and comprehensive summary record of contrasting and competing expert forecasts and judgements about the major issues confronting China within four principal domains political economic environmental and international After considering the principal forecasting methods available to experts the author comments critically on the degree of success achieved in using those methods and emphasises the confusion created by the polarisation of opinion and by the failure of many experts to accept the high degree of uncertainty that characterises most of the key issues The book recommends a new approach based on the study of a hierarchy of critical uncertainties and on continuing analysis of opposing expert opinions about these uncertainties It emphasises the potential for both positive and negative outcomes for these critical uncertainties and the importance of maximising the potential for positive outcomes through improved analytical and policy frameworks Providing insights for specialists and non specialists into the most critical issues that will determine China's future direction this book will be of particular interest to students and scholars of political economic environmental

and international relations issues in China and Asia as well as to readers in business and government
