However, few clinicians are informed about these health concerns and how to adequately treat them in this population. Therefore, there is an urgent need for practitioners to understand the latest information regarding treatments that will be useful to this specific population. *Mental Health Intervention and Treatment of First Responders and Emergency Workers* is an essential reference source that focuses on the latest research for diagnosing and treating mental health issues experienced by emergency personnel and seeks to generate awareness and inform clinicians about the unique circumstances encountered by these professionals. While highlighting topics including anxiety disorders and stress management, this book is ideally designed for clinicians, therapists, psychologists, psychiatrists, practitioners, medical professionals, EMTs, law enforcement, fire departments, military, academicians, researchers, policymakers and students seeking current research on psychological therapy methods regarding first responders.
