 The fame of the Polish school at Lvov rests with the diverse and fundamental contributions of Polish mathematicians working  
 there during the interwar years In particular despite material hardship and without a notable mathematical tradition the  
 school made major contributions to what is now called functional analysis The results and names of Banach Kac Kuratowski  
 Mazur Nikodym Orlicz Schauder Sierpi ski Steinhaus and Ulam among others now appear in all the standard textbooks The  
 vibrant joie de vivre and singular ambience of Lvov s once scintillating social scene are evocatively recaptured in personal  
 recollections The heyday of the famous Scottish Caf unquestionably the most mathematically productive cafeteria of all time  
 and its precious Scottish Book of highly influential problems are described in detail revealing the special synergy of  
 scholarship and camaraderie that permanently elevated Polish mathematics from utter obscurity to global prominence This  
 chronicle of the Lvov school its legacy and the tumultuous historical events which defined its lifespan will appeal equally to  
 mathematicians historians or general readers seeking a cultural and institutional overview of key aspects of twentieth  
 century Polish mathematics not described anywhere else in the extant English language literature      **"Europe" Turned  
 Local - The Local Turned European?** Stavroula Philippou, 2012 This book draws theoretically and methodologically from  
 the sociology of curriculum educational policy and comparative education to meta analyze the findings of nine separate  
 studies exploring constructions of Europe in the secondary school curricula of Social Studies from a number of countries  
 Germany Greece France Poland Cyprus Sweden Ireland and Northern Ireland as well as the Autonomous Community of the  
 Basque Country Spain The objectives of the book are threefold first to explore constructions of Europe and European identity  
 citizenship in these countries curricula second to explore whether and if so how these findings indicate a Europeanization of

national curricula and third to discuss the similarities differences continuities discontinuities and tensions identified when comparing these curricula Series Europa lernen Perspektiven fur eine Didaktik europaischer Kulturstudien Vol 2

Sauvy,2012-12-06 It is difficult for us today to imagine that equal educational opportunity with which we are so deeply preoccupied was at one time considered to be if not an evil at least a futile objective and that those who held such an opinion were completely insincere and even disinterested For a vertically stratified society equality of education had to be opposed because it would disturb an equilibrium as vital as that of a building In the Middle Ages only the Church was able to look for new members at the bottom of the social ladder since ecclesiastical office was not inherited by birth But efforts in this direction were necessarily very limited even if only because of the material obstacles to such an aim Equality of education as well as any other type of equality could not even be imagined by the aristocracy whose very existence would have been threatened Its initial indifference was followed by active opposition When it became possible to formulate the question of the diffusion of education in the 17th and 18th centuries the principle itself met with a fundamental objection The ruling class idle by its very nature feared that the workers and especially those on the land would abandon their productive labours now felt to be degrading and swell the ranks of the parasites in the cities
