Naval Operations Concept 2010 Admiral Gary Roughead, Admiral Thad W. Allen, James Conway, 2010-05-25 The daily service and sacrifice of Sailors Marines and Coast Guardsmen are constant reminders that we

are a Nation at war As we continue to stabilize Iraq and counter a resurgent Taliban in Afghanistan extremist ideologues terrorists criminals and rogue states still mar the international landscape promoting their interests by undermining global stability Concurrently several key regional powers continue to significantly enhance their own military capabilities To deal with the expanding range of these challenges we must always be prepared and ready to assume new missions today and tomorrow Four years ago the Navy and Marine Corps presented a unified vision for the future Naval Operations Concept 2006 NOC 06 It served as an intellectual stimulus for evolving our Maritime Strategy to meet the challenges of the 21st century The Navy and Marine Corps joined by our seagoing partner the U S Coast Guard explored the ideas articulated in NOC 06 to inform development of our new Maritime Strategy With the publication of A Cooperative Strategy for 21st Century Seapower CS 21 in October 2007 NOC 06 fulfilled its purpose Naval Operations Concept 2010 NOC 10 describes when where and how U S naval forces will contribute to enhancing security preventing conflict and prevailing in war NOC 10 is not designed for a cursory reading it is a publication intended for serious study by professionals Readers will quickly discern several themes that collectively embody the essence of naval service to our Nation Implicit in these themes is that Sailors Marines and Coast Guardsmen should expect to be engaged in both preventing and winning wars These themes reflect the content of CS 21 as well as the guidance provided by the Secretary of Defense in the National Defense Strategy NDS and the 2010 Quadrennial Defense Review QDR The sea services have a long history of accomplishing diverse missions from protecting American merchantmen during an undeclared naval war in the late 18th century to establishing our naval prowess in the War of 1812 to suppressing the African slave trade and West Indian piracy in the 19th century to fighting the major wars and confronting the irregular challenges of the 20th century As the 21st century unfolds we must continue to be effective warriors as well as informed and articulate ambassadors serving our Nation s interests and facilitating free global interaction from the sea

The U.S. Naval Institute on Naval Strategy Thomas J Cutler, 2015-09-15 In the U S Navy Wheel Books were once found in the uniform pockets of every junior and many senior petty officers Each small notebook was unique to the Sailor carrying it but all had in common a collection of data and wisdom that the individual deemed useful in the effective execution of his or her duties Often used as a substitute for experience among neophytes and as a portable library of reference information for more experienced personnel those weathered pages contained everything from the time of the next tide to leadership hints from a respected chief petty officer to the color coding of the phone and distance line used in underway replenishments In that same tradition the new Naval Institute Wheel Books will provide supplemental information pragmatic advice and cogent analysis on topics important to all naval professionals Drawn from the U S Naval Institute s vast archives the series will combine articles from the Institute s flagship publication Proceedings selections from the oral history collection and from Naval Institute Press books to create unique guides on a wide array of fundamental professional subjects Strategy is described by the Dictionary of Modern Strategy and Tactics as having a permanent nature

but an ever changing character For more than a century both the nature and the character of this essential discipline have been explored in depth by contributors to the Naval Institute s magazines books and oral histories Drawing from those powerful resources this collection makes clear why naval strategy has always straddled the boundaries between art and science and why its study and employment are essential components of the sea service profession *Naval Operations Concept 2010* United States Navy,2010 Describes when where and how U S naval forces will contribute to preventing conflict and prevailing in war It guides Maritime Strategy implementation in a manner consistent with national strategy and describes the ways with which the sea services will achieve the ends articulated in A Cooperative Strategy for 21st Century Seapower NOC 10 describes who we are as a Naval Service what we believe where we operate and what we provide the Nation In this era of strategic uncertainty regionally concentrated and globally distributed naval forces are uniquely capable of preventing conflict and when necessary prevailing in war *Seapower* Geoffrey Till,2013 This revised updated and expanded edition of Geoffrey Till s acclaimed textbook provides an invaluable guide for anyone interested in the changing and crucial role of seapower in the 21st century *Proceedings of the United States Naval Institute* United States Naval Institute,2013-07 **Maritime Power and the Law of the Sea** James Kraska,2011 In *Maritime Power and the Law of the Sea* Expeditionary Operations in World Politics Commander James Kraska analyzes the evolving rules governing freedom of the seas and their impact on expeditionary operations in the littoral near shore coastal zone Coastal state practice and international law are developing in ways that restrict naval access to the littorals and associated coastal communities and inshore regions that have become the fulcrum of world geopolitics Consequently the ability of naval forces to project expeditionary power throughout semi enclosed seas exclusive economic zones EEZs and along the important sea shore interface is diminishing and as a result limiting strategic access and freedom of action where it is most needed Commander Kraska describes how control of the global commons coupled with new approaches to sea power and expeditionary force projection has given the United States and its allies the ability to assert overwhelming sea power to nearly any area of the globe But as the law of the sea gravitates away from a classic liberal order of the oceans naval forces are finding it more challenging to accomplish the spectrum of maritime missions in the coastal littorals including forward presence power projection deterrence humanitarian assistance and sea control The developing legal order of the oceans fuses diplomacy strategy and international law to directly challenge unimpeded access to coastal areas with profound implications for American grand strategy and world politics *Contemporary Maritime Piracy* James Kraska,2011-06-02 This volume provides a concise introduction to the issues and debates regarding modern piracy including naval operations law and diplomacy and focuses on the recent surge of attacks off the coasts of Africa and Asia In the past decade the incidence of maritime piracy has exploded The first three months of 2011 were the worst ever with 18 ships hijacked 344 crew taken hostage and 7 crew members murdered The four Americans on board the sailing vessel *Quest* were shot at point blank range

The economic costs are also staggering reaching 7 to 12 billion per year as insurance costs skyrocket ransoms double and then quadruple and ships are forced to hire armed security for protection Pirates operating off the Horn of Africa disrupt shipping traffic through the strategic Suez Canal siphoning transit fees from an unstable Egypt while the seizure of supertankers in the Indian Ocean underscores the vulnerability of the world's oil supply Governments private industry and international organizations have mobilized to address the threat This is the first volume to examine their work in developing naval strategy international law and diplomacy and industry guidelines to suppress contemporary maritime piracy Contemporary Maritime Piracy International Law Strategy and Diplomacy at Sea comprises three sections the first of which contains chapters on historical and contemporary piracy international law and diplomacy and coalition strategies for combating future piracy The second and third parts provide collections of historic profiles and relevant documents

Maritime Security Cooperation in the Gulf of Guinea Kamal-Deen Ali, 2015-07-28 In Maritime Security Cooperation in the Guinea Prospects and Challenges Kamal Deen Ali provides ground breaking analyses of the maritime security situation in the Gulf of Guinea and its implications for shipping energy security sustainable fisheries as well as national and regional security The book juxtaposes the growing strategic importance of the Gulf of Guinea against the rising insecurity in the maritime domain especially from piracy Ali points out key gaps in prevailing regional and international approaches to maritime security cooperation in the Gulf of Guinea and sets out several suggestions for combating piracy as well as other maritime security threats while effectively enhancing maritime security cooperation in the region

Narcosubmarines Javier Guerrero C., 2019-09-26 This book is about the encounters of Colombian drug smugglers and the Colombian Navy both in the open seas and along coastlines Javier Guerrero C specifically examines the technologies involved in the War on Drugs such as the narcosubmarines and patrol boats the knowledge required to transport drugs and the knowledge required to stop the illicit flows The author presents compelling new evidence for advancing an understanding of technological innovation in antagonist contexts as well as the symbiotic and co evolutionary character of the process of technological innovation in the War on Drugs This book will appeal both to practitioners and scholars interested in the War on Drugs and the production of technologies in outlaw contexts

International Maritime Security Law James Kraska, Raul Pedrozo, 2013-04-15 International Maritime Security Law by James Kraska and Raul Pedrozo defines an emerging interdisciplinary field of law and policy comprised of norms legal regimes and rules to address today's hybrid threats to the global order of the oceans Worldwide shipping commerce fishing fleets pleasure craft and coastal states are exposed to the menace of offshore terrorism weapons of mass destruction piracy smuggling robbery marine insurgency and anti access threats Land based institutions and maritime constabulary forces operate within an increasingly integrated network that blends elements of humanitarian law human rights law criminal law and law of the sea with inspection regimes commercial enterprise and marine safety and environmental stewardship The new authorities fuse together a global maritime partnership among states

international organizations and commercial interests to protect the maritime commons from the most dangerous risks and hazards

Competitive Strategies for the 21st Century Thomas G. Mahnken, 2012-08-08 The U S today faces the most complex and challenging security environment in recent memory even as it deals with growing constraints on its ability to respond to threats Its most consequential challenge is the rise of China which increasingly has the capability to deny the U S access to areas of vital national interest and to undermine alliances that have underpinned regional stability for over half a century Thus the time is right for the U S to adopt a long term strategy for dealing with China one that includes but is not limited to military means and that fully includes U S allies in the region This book uses the theory and practice of peacetime great power strategic competition to derive recommendations for just such a strategy After examining the theory of peacetime strategic competition it assesses the U S China military balance in depth considers the role of America s allies in the region and explores strategies that the U S could adopt to improve its strategic position relative to China over the long term

Asia's Naval Expansion Geoffrey Till, 2017-10-03 The navies of China India and to a lesser extent Japan are expanding rapidly at present This has the potential to alter the US dominated naval balance in Asia Pacific but it also raises a question are the regions powers involved in a naval arms race Naval development is and always has been a crucial indicator of economic and political development It shows the emergence of a significant shift in strategic weight from West to East But within the Asia Pacific Region alongside growing economic and institutional integration there are geo political tensions that threaten the regions stability and peace The balance between the two determines the form that naval development in that region is taking Some aspects of this suggest the beginnings of a naval arms race that would have profound consequences for the region and the world

Toward a New Maritime Strategy Peter Haynes, 2015-07-15 *Toward a New Maritime Strategy* examines the evolution of American naval thinking in the post Cold War era It recounts the development of the U S Navy s key strategic documents from the fall of the Berlin Wall in 1989 to the release in 2007 of the U S Navy s maritime strategy A Cooperative Strategy for 21st Century Seapower This penetrating intellectual history critically analyzes the Navy s ideas and recounts how they interacted with those that govern U S strategy to shape the course of U S naval strategy The book explains how the Navy arrived at its current strategic outlook and why it took nearly two decades to develop a new maritime strategy Haynes criticizes the Navy s leaders for their narrow worldview and failure to understand the virtues and contributions of American sea power particularly in an era of globalization This provocative study tests institutional wisdom and will surely provoke debate in the Navy the Pentagon and U S and international naval and defense circles

Piracy in Southeast Asia Carolin Liss, Ted Biggs, 2016-11-25 This book combines multi disciplinary ethnographic and theoretical approaches to examine piracy in Southeast Asia and the regional and international responses to this threat During the piracy boom of the early to mid 2000s the issue of piracy in Southeast Asia received substantial academic attention Recent scholarship however has shifted the focus to Somali piracy and the resurgence of piracy in Southeast Asia has largely been

neglected in the academic community This volume seeks to remedy this gap in the current literature The primary aim is to examine how piracy has evolved in Southeast Asia over the past ten years to address why piracy has re emerged as a security threat to evaluate efforts at maintaining security in regional waters and to offer an analysis of what might be expected in the next decade The contributions are drawn from academics policy makers and military officers covering a range of disciplines including international relations socio cultural anthropology security studies history law and Asian studies Taken together the contributions in this volume provide a better understanding of contemporary piracy in Southeast Asia and suggest avenues to successfully combat piracy in this region This book will be of much interest to students of maritime security Asian politics security studies and international relations in general

Small Navies Michael Mulqueen, Deborah Sanders, Ian Speller, 2016-04-01 Whilst maritime studies tend to reflect the dominance of large navies history shows how relatively small naval forces can have a disproportionately large impact on global events From Confederate commerce raiders in the nineteenth century to Somali pirates today even the most minor of maritime forces can become a key player on a global stage Examining a broad range of examples this volume addresses the roles and activities of small navies in the past and the present at the national regional and international level In particular it focusses on the different ways in which such forces have identified and addressed national and international security challenges and the way in which they interact with other navies and security agencies In addition the collection also investigates the relationship of such navies with non governmental organisations institutions and bodies in pursuit of broader maritime goals be they political financial or environmental Adopting an interdisciplinary approach drawing on the best new research from the fields of international relations security studies strategic studies and maritime history the book examines the diversity of experience amongst different smaller navies and also establishes areas of similarity Divided into two sections part one begins with a number of chapters that are theoretical in nature whilst part two provides case studies that offer a more regional focus including analysis of the challenges facing contemporary navies and historical case studies designed to reveal the experience of small navies over time By adopting an approach that combines historical considerations with analysis of current events the collection offers a unique perspective on the role that small navies have played in wider nautical affairs and their continued impact upon global maritime strategies

The South China Sea C. J. Jenner, Tran Truong Thuy, 2016-09 The South China Sea has long been a source of conflict and represents a core contemporary security issue in the Indo Asia Pacific region This book offers an empirical analysis of the global ocean s most contested maritime territory the South China Sea and its agents of contest

International Order at Sea Jo Inge Bekkevold, Geoffrey Till, 2016-10-15 This book examines how international order at sea is challenged changed and maintained The book surveys challenges to the international order at sea in the Asia Pacific the Indian Ocean Region the Atlantic Ocean and the Arctic Ocean It explores the interaction between and cooperation among leading emerging and smaller naval powers both naval and coastguard responses required for the maintenance of

good order at sea Six broad and interlinked issues are identified that will influence the future international order at sea the balance between the maritime and the continental domains the balance between great power rivalry and cooperation the contest between access and denial the operational balance between preparing building and training for warfighting as opposed to operations other than war how to manage disorder security challenges that very often transcends territorial waters and national boundaries and finally the balance between safeguarding national interests and contributing to collective efforts preserving the international order at sea
