- **Figure 10.10** illustrates how the **cost of capital** is determined by the **cost of equity** and the **cost of debt**.
- **Cost of equity** is the return that investors expect to receive on their investment in the company's common stock.
- **Cost of debt** is the return that lenders expect to receive on their investment in the company's debt.
- **Weighted average cost of capital (WACC)** is the average of the cost of equity and the cost of debt, weighted by their relative proportions in the company's capital structure.
- **WACC** is used to calculate the present value of the company's future cash flows.
- **WACC** is also used to evaluate the company's investment opportunities.
