Geometry Maths Accelerator:

General Relativistic Self-Similar Waves that Induce an Anomalous Acceleration into the Standard Model of Cosmology

Joel Smoller, Blake Temple, 2012 The authors prove that the Einstein equations for a spherically symmetric spacetime in Standard Schwarzschild Coordinates SSC close to form a system of three ordinary differential equations for a family of self similar expansion waves and the critical $k = 0$ Friedmann universe associated with the pure radiation phase of the Standard Model of Cosmology is embedded as a single point in this family Removing a scaling law and imposing regularity at the center they prove that the family reduces to an implicitly defined one parameter family of distinct spacetimes determined by the value of a new acceleration parameter a such that $a = 1$ corresponds to the Standard Model The authors prove that all of the self similar spacetimes in the family are distinct from the non critical $k \neq 0$ Friedmann spacetimes thereby characterizing the critical $k = 0$ Friedmann universe as the unique spacetime lying at the intersection of these two one parameter families They then present a mathematically rigorous analysis of solutions near the singular point at the center deriving the expansion of solutions up to fourth order in the fractional distance to the Hubble Length Finally they use these rigorous estimates to calculate the exact leading order quadratic and cubic corrections to the redshift vs luminosity relation for an observer at the center

A Guide to Detracking Math Courses Angela Torres, Ho Nguyen, Laura Wentworth Streeter, Elizabeth Hull Barnes, Laura Wentworth, 2023-04-26 Create a pathway to equity by detracking mathematics The tracked mathematics system has been operating in US schools for decades However research demonstrates negative effects on subgroups of students by keeping them in a single math track thereby denying them access to rigorous coursework needed for college and career readiness The journey to change this involves confronting some long standing beliefs and structures in education When supported with the right structures instructional shifts coalition building and educator training and support the detracking of mathematics courses can be a primary pathway to equity The ultimate goal is to increase more students access to and achievement in higher levels of mathematics learning especially for students who are historically marginalized Based on the stories and lessons learned from the San Francisco Unified School District educators who have talked the talk and walked the walk this book provides a model for all those involved in taking on detracking efforts from policymakers and school administrators to math coaches and teachers By sharing stories of real world examples lessons learned and prompts to provoke discussion about your own context the book walks you through Designing and gaining support for a policy of detracked math courses Implementing the policy through practical shifts in scheduling curriculum professional development and coaching Supporting and improving the policy through continuous research monitoring and maintenance This book offers the big ideas that help you in your own unique journey to advance equity in your school or district s mathematics education and also provides practical information to help students in a detracked system thrive
