# Geometry Vocabulary Quiz

- |                                                                                                                                                 |                         |
|-------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|
| 1. A part of a line or a ray that extends from one endpoint to another                                                                          | A. ray                  |
| 2. An exact location that is usually represented by a dot and capital letter                                                                    | B. complementary angles |
| 3. A part of a line that has one endpoint and extends without end in one direction.                                                             | C. plane                |
| 4. A perfectly flat surface that extends infinitely in all directions. Made up of at least 3 points.                                            | D. right angle          |
| 5. A straight path that extends without end in opposite directions.                                                                             | E. congruent            |
| 6. Formed by two rays with a common endpoint                                                                                                    | F. line segment         |
| 7. Common endpoint for an angle                                                                                                                 | G. supplementary angles |
| 8. An angle that measures exactly 180 degrees                                                                                                   | H. adjacent angles      |
| 9. Angle that measures exactly 90 degrees                                                                                                       | I. vertical angles      |
| 10. An angle that measures more than 90 degrees but less than 180 degrees                                                                       | J. transversal          |
| 11. An angle that measures less than 90 degrees                                                                                                 | K. angle                |
| 12. Having the same length or size                                                                                                              | L. straight angle       |
| 13. The sum of two angles is 90 degrees                                                                                                         | M. obtuse angle         |
| 14. The sum of the measures of two angles is 180 degrees                                                                                        | N. line                 |
| 15. Have a common vertex and a common side but no common interior points. These angles when formed by two intersecting lines are supplementary. | O. acute angle          |
| 16. Opposite angles formed by two intersecting lines.                                                                                           | P. vertex               |
| 17. A line that intersects two or more lines                                                                                                    | Q. point                |
