

Oil Filler Dipstick

Oil Filler Dipstick

Oil Filler Dipstick

5. After draining, clean the strainer (3) and reinstall it.

(When refilling)

- Remove the filling plug with the dipstick, and fill the new transmission fluid to H level on the dipstick.
- Start the engine, and perform the following operations. However, absolutely avoid engaging the PTO lever during this operation.
 - Depress the speed change pedal alternately to the forward side and reverse side in order to move the machine forward and backward.
 - Rotate the steering wheel to the right and left to turn the front wheels right and left.
 - Operate the mower lift lever in order to make the mower deck go up and down.
 - During the operation described above, check to see if no oil leakage from the transaxle assembly and each hydraulic pipe is found.
- At least 5 minutes after stopping the engine, check the oil level again, using the dipstick.
- If the oil level is lower than the H level indicated on the dipstick, fill the oil tank with transmission fluid additionally up to the H level.
- Perform the above-mentioned operation again. And confirm that the oil level is not low level.
- Disconnect the universal joint of mower deck from the PTO shaft. Shift the PTO lever to "Engage" position, and check to see if the PTO shaft rotates quickly without abnormal noise. Next, shift the PTO lever to the "Disengage" position, and check to see if the PTO shaft stops operation quickly without abnormal noise.

■ IMPORTANT

- Park the machine on level ground.
- Use the KUBOTA UDT or SUPER UDT fluid. Use of other oils may damage the transmission or hydraulic system. Refer to "4. LUBRICANTS, FUEL, AND COOLANT" at "G. GENERAL" section.
- Do not mix different brand oil together.
