China Before the implementation of the new curriculum reforms in China at the beginning of the twenty first century there was neither Chinese nor Western popular music in textbook materials Popular culture had long been prohibited in school music education by China's strong revolutionary orientation which feared spiritual pollution by Western cultures However since the early twenty first century education reform has attempted to help students deal with experiences in their daily lives and has officially included learning the canon of popular music in the music curriculum In relation to this topic this book analyses how social transformation and cultural politics have affected community relations and the transmission of popular music through school music education Ho presents music and music education as sociopolitical constructions of nationalism and globalization Moreover how popular music is received in national and global contexts and how it affects the construction of social and musical meanings in school music education as well as the reformation of music education in mainland China is discussed Based on the perspectives of school music teachers and students the findings of the empirical studies in this book address the power and potential use of popular music in school music education as a producer and reproducer of cultural politics in the music curriculum in the mainland Dynamics of Disasters Ilias S. The Rabbit Effect Kelli Harding, 2019-08-27 This groundbreaking and life changing work based on the latest research effectively demonstrates the profound impact that love connection and kindness have on our health Mark Williamson PhD director of Action for Happiness When Columbia University doctor Kelli Harding began her clinical practice she never intended to explore the invisible factors behind our health But then there were the rabbits In 1978 a seemingly straightforward experiment designed to establish the relationship between high blood cholesterol and heart health in rabbits discovered that kindness in the form of a particularly nurturing post doc who pet and spoke to the lab rabbits as she fed them made the difference between a heart attack and a healthy heart As Dr Kelli Harding reveals in this eye opening book the rabbits were just the beginning of a much larger story Groundbreaking new research shows that love friendship community and our environment can have a greater impact on our health than anything that happens in the doctor's office For instance chronic loneliness can be as unhealthy as smoking a pack of cigarettes a day napping regularly can decrease one's risk of heart disease and people with purpose are less likely to get sick At once

paradigm shifting and empowering The Rabbit Effect illuminates vital public health research showing kindness in our day to day lives can make the world a healthier happier place I recommend this book highly for anyone who wants to live more healthfully Christy Turlington Burns and CEO of Every Mother Counts Transnational Law and State Transformation Jennifer Lander, 2019-11-07 This book contributes new theoretical insight and in depth empirical analysis about the relationship between transnational legality state change and the globalisation of markets The role of transnational economic law in influencing and reorganising national systems of governance evidences the constitutional dimensions of global capitalism the power to institute new rules and limits for national states This form of new constitutionalism does not undermine the state but transforms it by eroding national capacities and implanting global alternatives While leading scholars in the field have emphasised the much needed value of case studies there are no studies available which consider the cumulative impact of multiple axes of transnational legal ordering on the national state or its constitution This monograph addresses this empirical gap whilst expanding the theoretical scope of the field Mongolia s recent transformation as a mineral exporting country provides a rare opportunity to witness economic and legal globalisation in process Based on careful empirical analysis of national law and policy making the book traces the way distinctive processes of transnational legal ordering have reorganised and reframed the governance of Mongolia s mining sector specifically by redistributing state power in relation to the market sub national administrations and civil society The book investigates the role of international financial institutions multinational corporations and non governmental organisations in normative transmission as well as the critical role of national actors in embedding transnational investment norms within the domestic legal and policy environment As the book demonstrates however the constitutional ramifications of transnational legal ordering extend beyond the mining regime itself into more fundamental questions of the trajectory of state transformation institutionally and ideologically The book will be of interest to scholars of international law global governance and the political economy of development *The Behaviorally Informed Organization* Dilip Soman, Catherine Yeung, 2021 Using case studies and best practices as examples of success this book helps managers understand why and how they can embed behavioral insights into the structure and operations of any organization *Democratization in EU Foreign Policy* Benedetta Berti, Kristina Mikulova, Nicu Popescu, 2015-09-16 New democracies are uniquely positioned to promote democratic values and have a competitive advantage in the global democracy assistance industry This book examines the attempts of one group of young democracies from Central and Eastern Europe CEE to channel this pro democracy agenda into both national and European foreign policy and development support It looks at how CEE is upstream changing the EU on crucial policy issues as part of the common foreign and security policy Furthermore it tracks the process whereby imported ideas and norms are recycled for further export downstream and how these concepts are received in countries outside of the EU including the post Soviet space the Western Balkans the Middle East and North Africa region and Central Asia This text will be of key interest to

Why Women Should Be Taken More Seriously in the Boardroom Barrie Gunter, 2017-04-21 Historically there has been a lack of parity between women and men in senior corporate roles particularly in major companies with the biggest market capitalisation This can be partly explained by inequalities of career opportunity and also women's self-perceptions Yet there are plenty of examples in business and other worlds notably politics that women can perform effectively in the highest leadership roles Some countries have actively encouraged greater female representation on the boards of major companies This is a positive step forward When women join the boards of top companies the decision making climates of these bodies can change for the better When women are appointed as leaders of poorly performing companies they can turn them around and convert them into success stories every bit as often as male appointees Women have been dismissed as lacking the character for business leadership Sometimes women are their own worst enemies and feel uncomfortable when members of their own gender act more like men Yet self-belief can strengthen their perceived suitability for top jobs Women do need to act tougher to get to the top but this does not mean abandoning their femininity or having a fulfilling life outside business **Why Women Should Be Taken More Seriously in the Boardroom** is a useful tool for business students as well as those in the corporate world looking to gain a deeper understanding of gender balance within leadership roles
