Encyclopedia of Biomedical Gerontology ,2019-11-20 Encyclopedia of Biomedical Gerontology Three Volume Set presents a wide range of topics ranging from what happens in the body during aging the reasons and mechanisms relating to those age related changes and their clinical psychological and social modulators and determinants The book covers the biological and medical aspects of gerontology within the general framework of the biological basis of assessing age biological mechanisms of aging age related changes in biological systems human age related diseases the biomedical practicality and impracticality of interventions and finally the ethics of intervention Provides a one stop resource to information written by world leading scholars in the field of biomedical gerontology Fills a critical gap of information in a field that has seen significant progress in the last 10 years

The Biological Resources of Model Organisms Robert L. Jarret,Kevin McCluskey,2019-07-16 This book discusses 14

model organisms and are used by thousands of researchers teachers and students each year in laboratories and classrooms around the globe Though acknowledged in innumerable scientific journal articles little is generally known about the origin of these collections how the organisms contained within them have been acquired and how they are maintained and distributed While some collections such as *Drosophila* have long histories others such as the collection of *Brachionus* are relatively new They vary greatly in size Yet all have contributed and are continuing to contribute to global research efforts in many areas of scientific research as diverse as tissue regeneration skin cancer evolution water purity gene function and hundreds of others In addition to providing the raw materials for national and international research programs these collections also provide educational tools used by colleges and high schools The chapters in this book attempt to provide a brief look at the individual organisms how they came to be accepted as model organisms the history of the individual collections examples of how the organisms have been and are being used in scientific research and a description of the facilities and procedures used to maintain them

Features Provides an in depth look at the collections of 14 model organisms that have enabled innumerable scientific breakthroughs over decades and that continue to do so Includes detailed descriptions of the operating procedures used for the maintenance of each model organism collection Discusses the holdings of the collections of model organisms and its relevance to past current and future scientific research Written by the leaders in the field of the management of model organisms

duration of life At the same time healthcare has become so costly that it can easily bankrupt governments and impoverish individuals and families Health services research is a highly multidisciplinary field including such areas as health administration health economics medical sociology medicine political science public health and public policy The Encyclopedia of Health Services Research is the first single reference source to capture the diversity and complexity of the field With more than 400 entries these two volumes investigate the relationship between the factors of cost quality and access to healthcare and their impact upon medical outcomes such as death disability disease discomfort and dissatisfaction with care Key Features Examines the growing healthcare crisis facing the United States Encompasses the structure process and outcomes of healthcare Aims to improve the equity efficiency effectiveness and safety of healthcare by influencing and developing public policies Describes healthcare systems and issues from around the globe Key Themes Access to Care Accreditation Associations Foundations and Research Organizations Biographies of Current and Past Leaders Cost of Care Economics Finance and Payment Mechanisms Disease Disability Health and Health Behavior Government and International Healthcare Organizations Health Insurance Health Professionals and Healthcare Organizations Health Services Research Laws Regulations and Ethics Measurement Data Sources and Coding and Research Methods Outcomes of Care Policy Issues Healthcare Reform and International Comparisons Public Health Quality and Safety of Care Special and Vulnerable Groups The Encyclopedia is designed to be an introduction to the various topics of health services research for an audience including undergraduate students graduate students and general readers seeking non technical descriptions of the field and its practices It is also useful for healthcare practitioners wishing to stay abreast of the changes and updates in the field The Aging Auditory System Sandra Gordon-Salant, Robert D. Frisina, Richard R. Fay, Arthur Popper, 2010-05-03 This volume brings together noted scientists who study presbycusis from the perspective of complementary disciplines for a review of the current state of knowledge on the aging auditory system Age related hearing loss ARHL is one of the top three most common chronic health conditions affecting individuals aged 65 years and older The high prevalence of age related hearing loss compels audiologists otolaryngologists and auditory neuroscientists alike to understand the neural genetic and molecular mechanisms underlying this disorder A comprehensive understanding of these factors is needed so that effective prevention intervention and rehabilitative strategies can be developed to ameliorate the myriad of behavioral manifestations

Reliability Models for Engineers and Scientists Mark P. Kaminskiy, 2012-11-26 A discussion of the basic reliability concepts and models Reliability Models for Engineers and Scientists demystifies modern mathematical reliability models Requiring very little mathematical background on the reader's part this concise book introduces the models by focusing on their physical meaning and the supporting data it then goes on to provide a wide scope of possible applications The book also introduces a new concept of the Gini type index which when applied to aging rejuvenating components nonrepairable systems can measure how different a given aging rejuvenation distribution is compared to the exponential distribution A

similar index is then applied to aging rejuvenating repairable systems creating a bridge between the concepts The chapters discuss models used in reliability risk analysis physics of failure fracture mechanics biological pharmaceutical and medical studies They comprise an up to date concise and informative resource on reliability models which does not require any special mathematical background
