Zearn Math Kindergarten Course Guide Zearn, 2022-10 **MATH - Kindergarten** Kimberley Nash, Warren Nash, 2005-12-01 Kindergarten Math Getting started teaching your student math for the first time can seem overwhelming for some or a great adventure for others. Whatever your perspective, this curriculum workbook has all that you need to get your student off to a great start. Attractive artwork, easy to understand instructions, and adequate spacing make this curriculum tailored to your student's beginning abilities. The curriculum is interactive with lots of coloring opportunities to delight your student and refresh their attention as they learn the meatier aspects of math. Your student will complete two full pages of learning activities per day that integrates several learning skills in each session. By working sequentially through the entire curriculum, your student will be able to master all of the required math skills for this grade level mandated by state education departments. The curriculum begins with a variety of activities such as writing, reading, counting, and coloring skills that are developed while your student learns to recognize and write the numbers 1-20 as well as their names. Phonics-based short sentences with number words are inserted periodically for your student to practice reading and for you to gain perspective of his or her growing accomplishments. Next, your student moves on to exercises that include how many matching objects to numbers, counting groups of objects, and identifying objects in groups. After mastering number recognition, your student will continue on to learning about number order. Number order will help your student with sequencing as well as with what comes before, after, and in between. This leads to being able to discern which number is most or least in a group of numbers as well as if numbers are the same or different. Learning about shapes is also an important part of a student's math experience. Your student will learn to identify shapes by how they are constructed. He or she will learn how to count shapes, sort shapes, and write the words for shapes. And there are plenty of opportunities to color and draw shapes throughout the workbook. Putting numbers and shapes together naturally prepares your student for the next unit of learning involving the telling of time. Your student will learn to recognize and tell time on both standard and digital clocks. The study of time includes minutes, quarter hours, half hours, hours, and learning to identify time before and after a pre-selected time. Finally, your student will learn to recognize and know the value of our American monetary coins. Your student will increase their counting and sorting skills by working with this currency. When your student closes the last page of this

curriculum he or she will be well prepared for the next grade This curriculum is in a workbook format that your student will consume with pleasure The many pictures and activities will delight the learning process as well as ease its mastery Flash cards for daily practice are included for you to cut out and use as needed This spiral bound workbook lays flat for ease of use by young students *180 Days of Math for Prekindergarten ebook* Darcy Mellinger,2021-09-01 Introduce pre kindergarten math skills with fun and effective daily practice activities This prekindergarten workbook focuses on daily math practice to build mathematical fluency and confidence in young learners This math workbook makes at home learning whole class instruction or small group support quick and easy It includes standards based activities easy to follow instructions and an answer key to quickly assess student understanding Parents appreciate the teacher approved activity books that keep their child engaged and learning Great for homeschooling to reinforce learning at school or prevent learning loss over summer Teachers rely on the daily practice workbooks to save them valuable time The ready to implement activities are perfect for daily morning review or homework The activities can also be used for intervention skill building to address learning gaps
