HOW TO MAKE A ROBOT? saran venkatesh,2016-12-10 THIS THE FIRST EDITION IN MY BOOKS THIS BOOK CONTAIN HOW TO MAKE A ROBOT *How to Succeed in Competitive Robotics: An eBook Guide to Creating a Custom Engineering Notebook (Google Play Books edition)* Violet Cade Productions,2022-11-29 NOTE This edition has been formatted for Chromebooks laptops and desktops If you want to read this on a smaller device like a phone or e reader please get the Cell Phone edition Maybe you are a rookie team and don t know what an Engineering Notebook is or how to start to design and build a robot Maybe you are a new robotics coach or mentor looking for ANYTHING that can help you figure out what you are supposed to be doing Maybe you are here because your team has always struggled with developing your Engineering Notebook Or maybe you are here because you realized perhaps a little too late that you may need to put an Engineering Notebook together before your next competition next week This guide can help with all these scenarios But first it helps to step back and widen your perspective One of the most important yet neglected aspects of competitive robotics is organizing your team plan for the season and documenting it in your Engineering Notebook or it is sometimes called something else like a technical or design journal The Engineering Notebook is something that is often seen as an afterthought not important and can be put off until the last minute This could not be further from the truth Using a project management approach and documenting it with an Engineering Notebook is extremely helpful for developing your game strategy and your robot tracking your progress as a

team keeping your whole team informed of your collective progress providing a detailed reference for judges to see how much your team has accomplished providing a reference for your team for future competitions and seasons

How to Grow a Robot Mark H. Lee, 2020-04-28 How to develop robots that will be more like humans and less like computers more social than machine like and more playful and less programmed Most robots are not very friendly They vacuum the rug mow the lawn dispose of bombs even perform surgery but they aren't good conversationalists It's difficult to make eye contact If the future promises more human robot collaboration in both work and play wouldn't it be better if the robots were less mechanical and more social In *How to Grow a Robot* Mark Lee explores how robots can be more human like friendly and engaging Developments in artificial intelligence notably Deep Learning are widely seen as the foundation on which our robot future will be built These advances have already brought us self driving cars and chess match winning algorithms But Lee writes we need robots that are perceptive animated and responsive more like humans and less like computers more social than machine like and more playful and less programmed The way to achieve this he argues is to grow a robot so that it learns from experience just as infants do After describing what's wrong with artificial intelligence one key shortcoming it's not embodied Lee presents a different approach to building human like robots developmental robotics inspired by developmental psychology and its accounts of early infant behavior He describes his own experiments with the iCub humanoid robot and its development from newborn helplessness to ability levels equal to a nine month old explaining how the iCub learns from its own experiences AI robots are designed to know humans as objects developmental robots will learn empathy Developmental robots with an internal model of self will be better interactive partners with humans That is the kind of future technology we should work toward
