Baofeng Uv-5r Willie M Scott,2020-10-09 Want to Know How to Program and Get the Best Out of Your Baofeng UV 5R Like a Pro If yes this book will help you get the best out of your radio device guaranteed The Baofeng UV 5R is arguably one of the best selling radios of all time but it has one big complication the manual If you just bought or have a UV 5R and are struggling to get enough information from the manual OR you ve got your HAM radio license and have not done much OR you bought a Baofeng and still could not figure it out completely this book will get you up and running fast and easy whether you are planning to use it as nothing more than a walkie talkie for commercial purposes or as a HAM operator This Is a Preview of What You Will Learn Get to know the controls commands keys and display of your device Basic operations of the radio The menu options and using shortcuts effectively Dual Watch function Manual Programming of the radio Programming memories and channels Programming both simplex and repeater frequencies from the front keypad Using computer software to program repeaters And Much more This guide is written to make the best out of your radio device Don t struggle to figure out your radio Grab a copy of this book and spend your time enjoying your new hobby not fighting with it Scroll up and click the BUY NOW button to get started Baofeng -Uv5R Karl Kempf,2020-07-12 Want to get the best out of your Baofeng UV 5R Want to know how to operate the device better Want to know how to program the device like a pro You can now get the best out of your radio device Whether you are planning to use it as nothing more than a walkie talkie for commercial purposes or you are thinking about entering the world of amateur radio and make a HAM operator to be a hobby of yours This guide will cover everything you about your radio from Getting to know your device the controls commands keys display and more Basic operation of the radio basic functionalities making a call selecting frequencies and channels All the menu options and using shortcuts effectively Modes of Scanning Dual Watch function Signaling and Selective calling Manual Programming of the radio programming memories and channels And Much muchMore in this awesome unofficial manual to the Baofeng UV 5R Radio Programming Ralph Milton,1968 *Programming Amateur Radios with Chirp* Brian Schell,2018-06-04 Back in my day radios came with a CW key and a frequency knob and that was all we needed Every Old Ham Curmudgeon OK that s probably a slight exaggeration but radios were a lot simpler in the distant past when everything was station to station and most communications were some flavor of HF Nowadays we have HF VHF UHF digital modes CW SSB AM FM MW repeaters with offsets repeaters with tones User IDs reflectors talk groups and who knows what coming down the road for next year There are a lot of modes tones offsets and little nit picky details that have to go into our radios before we can even make a call On the other hand radios especially handheld models continue to get smaller lighter and generally have fewer physical buttons and controls This is good in that it keeps costs down adds to durability and allows for waterproofing but it doesn t make programming them any easier Fortunately we have computers to handle all the

programming stuff for us Just hook the radio up to the computer enter in all your information transfer the frequency and channel data into the radio and you re good to go Sounds simple doesn t it The problem is that radio manufacturers aren t necessarily good software designers God forbid you try to program a radio on an Apple or Linux computer using manufacturer s software None of the companies that make radios include software for these two very common operating systems None Even Windows users aren t in the clear What happens when you try to use the software that came with your radio when the radio was sold in 2007 and the software was made for Windows XP Or maybe your radio came with a state of the art serial port connector That was great back when all computers had serial ports now those are hard to find options or require an adaptor And even though many ham operators enjoy tinkering with computers there are many who still haven t embraced computers These things just aren t that simple Fortunately there is CHIRP a free multi platform software that works with a large number of common amateur radios CHIRP even has database tools for setting up local repeaters National Calling frequencies MURS FRS GMRS and Marine frequencies you may not even need to look anything up If you re already comfortable with using programming software from RT Systems or have no trouble working with whatever software that came with your radio than maybe this book isn t for you If you aren t good with computers or you re having trouble with the basic process don t know what all those columns mean or are otherwise pulling your hair out trying to get your radio programmed then this book is for you We ll walk through getting the software installed and set up connecting your radio with an appropriate cable and communications port reading template data from the radio editing that data and writing that data back out to the radio
