

## Group 15 - Steering Diagnostics

### Theory of Operation

The steering system is an open center system that provides full time steering control. Oil leaving the steering system is used in the main gearcase for lubrication, engaging both the separator drive and the unloading system.

The steering pump is the last pump in the stack of pumps located and driven off the hydrostatic unit and draws oil from the main gearcase sump. The pump assembly contains two pumps; the second pump being the main hydraulic pump.
