Matlab Mathematical Analysis:

MATLAB Mathematical Analysis Cesar Lopez, 2014-12-24 MATLAB Mathematical Analysis presents the techniques of mathematical analysis through examples and exercises resolved with MATLAB software. The purpose is to give you examples of all the mathematical analysis functions offered by MATLAB so that you can use them in your daily work regardless of the application. The book begins by introducing the reader to the use of numbers, operators, variables, and functions in the MATLAB environment. Then it delves into working with complex variables. A large section is devoted to working with and developing graphical representations of curves, surfaces, and volumes. MATLAB functions allow working with two-dimensional and three-dimensional graphics, statistical graphs, curves, and surfaces in explicit, implicit, parametric, and polar coordinates. Additional work implements twisted curves, surfaces, meshes, contours, volumes, and graphical interpolation. The following part covers limits, functions, continuity, and numerical and power series. Then differentiation is addressed in one and several variables, including differential theorems for vector fields. Thereafter, the topic of integration is handled, including improper integrals, definite and indefinite integration, integration in multiple variables, and multiple integrals and their applications. Differential equations are exemplified in detail. Laplace transforms, Taylor series, and the Runge-Kutta method and partial differential equations.

MATLAB Mathematical Analysis Cesar Lopez, 2014-12-23 MATLAB Mathematical Analysis is a reference book that presents the techniques of mathematical analysis through examples and exercises resolved with MATLAB software. The purpose is to give you examples of the mathematical analysis functions offered by MATLAB so that you can use them in your daily work regardless of the application. The book supposes proper training in the mathematics and so presents the basic knowledge required to be able to use MATLAB for calculational or symbolic solutions to your problems for a vast amount of MATLAB functions.
