Fire-Resistant Geopolymers Les Vickers, Arie van Riessen, William D. A. Rickard, 2014-12-05 The book covers the topic of geopolymers in particular it highlights the relationship between structural differences as a result of variations during the geopolymer synthesis and its physical and chemical properties In particular the book describes the optimization of the thermal properties of geopolymers by adding micro structural modifiers such as fibres and or fillers into the geopolymer matrix The range of fibres and fillers used in geopolymers their impact on the microstructure and thermal properties is described in great detail The book content will appeal to researchers scientists or engineers who are interested in geopolymer science and technology and its industrial applications

Environmental Technology and Sustainability Tamara Tatrishvili, Ann Rose Abraham, A. K. Haghi, 2024-04-23 This new title covers the most recent theoretical and practical advancements in green technology for a clean and healthy environment It aims to provide a better understanding of the research and development of new technologies that are becoming increasingly important for ensuring sustainability The book provides vital information on advanced materials and green composites and expounds on environmental chemistry for a sustainable world focusing on different characterization methods as well as new techniques The volume also considers recent developments and applications of clean energy materials It presents case studies that emphasize the green technologies
