Capital and the Common Good Georgia Levenson Keohane, 2016-09-27 Despite social and economic advances around the world poverty and disease persist exacerbated by the mounting challenges of climate change natural disasters political conflict mass migration and economic inequality While governments commit to addressing these challenges traditional public and philanthropic dollars are not enough Here innovative finance has shown a way forward by borrowing techniques from the world of finance we can raise capital for social investments today Innovative finance has provided polio vaccines to children in the DRC crop insurance to farmers in India pay as you go solar electricity to Kenyans and affordable housing and transportation to New Yorkers It has helped governmental commercial and philanthropic resources meet the needs of the poor and underserved and build a more sustainable and inclusive prosperity Capital and the Common Good shows how market failure in one context can be solved with market solutions from another an expert in securitization bundles future development aid into bonds to pay for vaccines today an entrepreneur turns a mobile phone into an array of financial services for the unbanked and policy makers adapt pay for success models from the world of infrastructure to human services like early childhood education maternal health and job training Revisiting the successes and missteps of these efforts Georgia Levenson Keohane argues that innovative finance is as much about incentives and sound decision

making as it is about money When it works innovative finance gives us the tools motivation and security to invest in our shared future *Teach* Janice Koch,2019-01-02 *Teach* is a concise introduction to education that challenges students preconceived notions of teaching in order to transform them into reflective practitioners Empathizing with the difficulties students face as they move from the college classroom to their own classrooms revered author Janice Koch invites readers to both reflect on their own dispositions for teaching and look outside of themselves to the demands of the profession making the philosophy of teaching and learning accessible and relevant The Fourth Edition emphasizes the changing student population and the role of technology and globalization in the field while also including the Interstate Teacher Assessment and Support Consortium InTASC standards correlating with each chapter s content With the guidance of this supportive text students will gain vital exposure by engaging with professional standards from the very start of their career **Who's in Your Wallet** United States. Congress. House. Committee on Financial Services,2014 Assessing Contexts of Learning Susanne Kuger,Eckhard Klieme,Nina Jude,David Kaplan,2016-12-05 This volume brings together educational effectiveness research and international large scale assessments demonstrating how the two fields can be applied to inspire and improve each other and providing readers direct links to instruments that cover a broad range of topics and have been shown to work in more than 70 countries The book s initial chapters introduce and summarize recent discussions and developments in the conceptualization implementation and evaluation of international large scale context assessments and provide an outlook on possible future developments Subsequently three thematic sections Student Background Outcomes of Education Beyond Achievement and Learning in Schools each present a series of chapters that provide the conceptual background for a wide range of important topics in education research policy and practice Each chapter defines a conceptual framework that relates recent findings in the educational effectiveness research literature to current issues in education policy and practice These frameworks were used to develop interesting and relevant indicators that may be used for meaningful reporting from international assessments other cross cultural research or national studies Using the example of one particular survey the Programme for International Student Assessment PISA 2015 this volume links all theoretical considerations to fully developed questionnaire material that was field trailed and evaluated in questionnaires for students and their parents as well as teachers and principals in their schools The primary purposes of this book are to inform readers about how education effectiveness research and international large scale assessments are already interacting to inform research and policymaking to identify areas where a closer collaboration of both fields or input from other areas could further improve this work to provide sound theoretical frameworks for future work in both fields and finally to relate these theoretical debates to currently available and evaluated material for future context assessments **Subverting Consumerism** Robert Crocker,Keri Chiveralls,2018-07-24 There is now a widespread interest in reuse in many domains from opera houses built over old warehouses to vintage clothes and everyday goods incorporating repurposed materials or parts Despite its ubiquity

this extensive creative work is typically seen in narrowly environmental terms as a means of reducing carbon resource use or waste. However, as this volume shows, reuse also has aesthetic and cultural dimensions and a rich social currency invoked to consciously subvert the accelerated consumer culture responsible for our unfolding environmental crisis. In three parts, the essays in this book consider reuse in terms of values, aesthetics, and meaning; its application in contemporary urban and spatial settings; and the revival of social practices involving a more conscious recourse to reuse and repair. These are bookended by the editors' essays: the first on the significant relationship between reuse and technological and social acceleration evident in the surrounding consumer society, and the last on the multiple forms of reuse deployed in a contemporary alternative building practice and their contributions to presenting alternative ways of living in the world. Challenging dominant understandings of waste and consumption, *Subverting Consumerism* shows how reuse has become a means for many to creatively engage with the past and to discover a continuity and sense of place eroded by the accelerative regimes of contemporary consumerism. Becoming a means of resistance and offering a range of aesthetic, social, and economic possibilities, reuse can be found to subvert and challenge the obsessive quest for the new found in contemporary consumerism.

The Russian State and Russian Energy Companies, 1992-2018 Ingerid M. Opdahl, 2020-06-09. The Russian State and Russian Energy Companies analyses the development of relations between the state and five major energy companies and how this shaped Russia's foreign policy in the post-Soviet region. The book argues that the development of Russia's political economy mattered for foreign policy over the quarter of a century from 1992 to 2018. Energy companies' roles in institutional development enabled them to influence foreign policy formation, and they became available as tools to implement foreign policy. The extent to which it happened for each company varied with their accessibility to the Russian state. Institutional development increased state capacity in a way that strengthened Russia's political regime. The book shows how the combined power of several companies in the gas, oil, electricity, and nuclear energy industry was a key feature of Russian foreign policy, both in bilateral relationships and in support of Russia's regional position. In this way, Russia's energy resources were converted to regional influence. The book contributes to our understanding of Russia's political economy and its influence on foreign policy and of the formation of policy towards post-Soviet states. *Resources in Education*, 1988.
