**The Handbook of Art and Design Librarianship** Amanda Gluibizzi, Paul Glassman, 2010 While much attention has been paid to art librarianship as it exists in museum settings

comparatively less notice has been taken of academic and art and design school art librarianship as a distinct focus. However, the skills of subject specialists in the arts and their advocacy on behalf of their users are fundamental elements in vital art libraries that fully support and anticipate the needs of artists, designers, architects, and the historians who study these disciplines. Put together by an international team of contributors, this essential handbook examines methods of innovative librarianship in academic and art school libraries throughout the world. With a focus on the intersection of best practice and best opportunities, the book brings together the philosophies and realities of the most creative librarians working in the field of art librarianship today and serves as a field guide to academic art libraries in the twenty-first century. Key discussions include the role of liaison to the visual arts, visual literacy for highly literate viewers, art history pedagogy, and special collections technology in an art and design library, collection management, renewal and deaccession, new forms of scholarly communication, and their impact on art librarianship, the making of the 21st-century art library. Readership: This timely book is essential reading for all information professionals working in art and design environments. It will also be of interest to students of librarianship interested in the challenges currently facing professionals working in this specialized area.

**Cultural Economics** Ruth Towse, 2011-01-01 The second edition of this widely acclaimed and extensively cited collection of original contributions by specialist authors reflects changes in the field of cultural economics over the last eight years. Thoroughly revised chapters alongside new topics and contributors bring the Handbook up to date taking into account new research literature and the impact of new technologies in the creative industries. The book covers a range of topics encompassing the creative industries as well as the economics of the arts and culture and includes chapters on economics of art including auctions, markets, prices, anthropology, artists, labour, markets, creativity and the creative economy, cultural districts, cultural value, globalization and international trade, the internet, media, economics, museums, non-profit organisations, opera, performance indicators, performing arts, publishing, regulation, tax, expenditures and welfare economics. *Handbook of Cultural Economics, Third Edition* Ruth Towse, Trilce Navarrete Hernández, 2020-03-28 Cultural economics has become well established as a subject of interest for students and teachers of courses ranging from economics to arts administration as well as for policy makers and practitioners in the creative industries. Digitisation has had a tremendous impact on many areas of the creative economy and the third edition of this popular book fully reflects it. *Handbook of Gestalt-Theoretical Psychology of Art* Walter Coppel, 2025-06-16 The Handbook of Gestalt Theoretic Psychology of Art synthesizes contemporary research in the psychology of perception, cognition, language and hearing to reassess the Gestalt approach to studying the arts. Since Rudolf Arnheim's death in 2007 the field has seen a resurgence with scientists revisiting and reinventing previously articulated points of view. For the first time this new work is gathered in a single comprehensive resource. Beginning with a history of the field the book considers meta-theoretic issues before discussing the various senses. It explores topics including aesthetics, space, poetry, literature, music and film bringing together leading researchers from across the discipline. It will be an essential read for all students and researchers of the psychology of art, the psychology of perception or Gestalt Theory. **The Oxford Handbook of Ethics and Art** James Harold, 2023 Art has not always had the same salience in philosophical discussions of ethics that many other elements of our lives have. There are well defined areas of applied ethics corresponding to nature, business, health care, war, punishment, animals and more but there is no recognized research program in applied ethics of the arts or art ethics. Art often seems to belong to its own sphere of value separate from morality. The first questions we ask about art are usually not about its moral rightness or virtue but about its beauty or originality. However it is impossible to do any serious thinking about the arts without engaging in ethical questions.
