A) Goal Statement:

The goal of my experiment and research is to evaluate the various number of compounds to be used as hand warmers and locate the ones that can raise the temperature to 20 degrees Celsius in 100-g water, and costs as little as possible.

B) Detailed procedure, utilizing the simulation

Below, I have attached a figure that shows the data entered in the simulation, whereas the temperature and the mass of the solid and liquid are being put in and ran in the virtual calorimeter.

C) The Data Table for the compounds

Compound	QH20(kJ)	Mass(g)	Molar mass(g/mol)	Theoretical (kJ/mol)	Calculated (kJ/mol)	The % error
Sodium Hydroxide (NaOH)	-8.368	8	40	-44.51	-41.84	5.99%

Saving International Adoption Mark Montgomery,Irene Powell,2018-01-30 Choice Outstanding Academic Title of 2018 International adoption is in a state of virtual collapse rates having fallen by more than half since 2004 and continuing to fall Yet around the world millions of orphaned and vulnerable children need permanent homes and thousands of American and European families are eager to take them in Many government officials international bureaucrats and social commentators claim these adoptions are not in the best interests of the child They claim that adoption deprives children of their birth culture threatens their racial identities and even encourages widespread child trafficking Celebrity adopters are publicly excoriated for stealing children from their birth families This book argues that opposition to adoption ostensibly based on the well being of the child is often a smokescreen for protecting national pride Concerns about the harm done by transracial adoption are largely inconsistent with empirical evidence As for trafficking opponents of international adoption want to shut it down because it is too much like a market for children But this book offers a radical challenge to this view that is what if instead of trying to suppress market forces in international adoption we embraced them so they could be properly regulated What if the international system functioned more like open adoption in the United States where birth and adoptive parents can meet and privately negotiate the exchange of parental rights This arrangement the authors argue could eliminate the abuses that currently haunt international adoption The authors challenge the prevailing wisdom with their economic analyses and provocative analogies from other policy realms Based on their own family s experience with the adoption process they also write frankly about how that process feels for parents and children
