Pediatric Rehabilitation Medicine is a valuable first of its kind resource in its field. Featuring cutting edge clinical knowledge from practicing physicians and experts across specialties, the book offers comprehensive information in a quick and accessible fashion. This compact reference contains an impressive breadth of information. It provides evidence based guidance for day to day management of both common and uncommon problems and rehabilitation challenges specific to the pediatric patient. Beginning with an overview of normal pediatric development, the handbook's six parts cover a wide range of central nervous system disorders, neuromuscular, autoimmune, and musculoskeletal conditions, cancer, and pain, and evaluation and treatment modalities. Designed as a framework to inform clinical decision making, the book is an essential resource for health professionals providing rehabilitation care to children in a wide variety of disciplines and settings. This broad scope handbook is unique in its focus on pediatric rehabilitation and will help everyone from trainees to seasoned practitioners access the information they need to successfully manage associated problems and conditions in their younger patients. Key Features: Targets core clinical issues and areas of growing importance for a complete survey of pediatric rehabilitation medicine. Incorporates current literature and evidence based information throughout. Essential for practitioners at any level in PM/R, pediatrics, primary care, orthopedics, physical therapy, nursing, and others who see children with disabilities and injuries. Formatted for quick access in the busy clinical setting. Purchase includes access to the ebook for mobile use on most devices.

**Neurologic Interventions for Physical Therapy** Suzanne C. Martin, Mary Kessler, 2007-01-01. Master the role of the physical therapist or physical therapist assistant in neurologic rehabilitation. *Neurologic Interventions for Physical Therapy* 3rd Edition helps you develop skills in the treatment interventions needed to improve the function of patients with neurologic deficits. It provides a solid foundation in neuroanatomy, motor control, and motor development, and offers clear how-to guidelines to rehabilitation procedures. Case studies help you follow best practices for the treatment of children and adults with neuromuscular impairments caused by events such as spinal cord injuries, cerebral palsy, and traumatic brain injuries. Written by physical therapy experts Suzanne Tink Martin and Mary Kessler, this market leading text will help you prepare for the neurological portion of the PTA certification exam and begin a successful career in physical therapy practice. Comprehensive coverage of neurologic rehabilitation explores concepts in neuroanatomy, motor control, and motor learning, motor development, and evidence based treatment of adults and children with neuromuscular impairments. Over 700 photos and drawings clarify concepts, show anatomy, physiology, evaluation, and pathology, and depict the most current rehabilitation procedures and technology. Case studies demonstrate the patient examination and treatment process and show how to achieve consistency in documentation. Proprioceptive Neuromuscular Facilitation chapter describes how PNF can be used to improve a patient's performance of functional tasks by increasing strength, flexibility, and range of motion, key to the treatment of individuals post stroke. Review questions are included at the end of each chapter, with answers at the back of the book. Illustrated step by step intervention boxes, tables, and charts highlight important information and make it easy to find.
