Demystifying Scholarly Metrics gives librarians and faculty the confidence to navigate the maze of scholarly metrics identify quality journals in which to publish and measure the impact of scholarly works Both librarians and professors can be overwhelmed by the bewildering number of scholarly metrics This user friendly book demystifies them helping librarians become familiar with scholarly metrics and giving them the confidence to assist faculty at their institutions It also equips faculty authors with the knowledge to evaluate journals and use metrics to track their scholarly impact Several controversies exist in the scholarly metrics landscape including a disagreement between the proponents of altmetrics and traditional bibliometrics Even more contentious debates are breaking out over predatory journals and open access publishing Authors Mark Vinyard and Jaimie Beth Colvin who successfully launched a faculty publishing initiative explain which aspects of metrics are truly essential to grasp and they place these numbers in context They help readers identify the metrics that are the best fit for their scholarship and give librarians and professors the tools to make smart decisions in this changing scholarly metrics landscape

Automotive Fuels Reference Book, Fourth Edition Paul Richards,Jim Barker,2023-11-15 The earlier editions of this title have been best selling definitive references for those needing technical information about automotive fuels This long awaited latest edition has been thoroughly revised and updated yet retains the original fundamental fuels information that readers find so useful This book is written for those with an interest in or a need to understand automotive fuels Because automotive fuels can no longer be developed in isolation from the engines that will convert the fuel into the power necessary to drive our automobiles knowledge of automotive fuels will also be essential to those working with automotive engines Small quantities of fuel additives increasingly play an important role in bridging the gap that often exists between fuel that can easily be produced and fuel that is needed by the ever more sophisticated automotive engine This book pulls together in a single extensively referenced volume the three different but related topics of automotive fuels fuel additives and engines and shows how all three areas work together It includes a brief history of automotive fuels development followed by chapters on automotive fuels manufacture from crude oil and other fossil sources One chapter is dedicated to the manufacture of automotive fuels and fuel blending components from renewable sources including e fuels The safe handling transport and storage of fuels from all sources are covered New combustion systems to achieve reduced emissions and increased efficiency are discussed and the way in which the fuels physical and chemical characteristics affect these combustion processes and the emissions produced are included As CO₂ is now an important emission there is also discussion regarding low and non carbon

fuels and how they might be used There is also discussion on engine fuel system development and how these different systems affect the corresponding fuel requirements Because the book is for a global market fuel system technologies that only exist in the legacy fleet in some markets are included The way in which fuel requirements are developed and specified is discussed This covers test methods from simple laboratory bench tests through engine testing and long term test procedures ISBN 9781468605785 ISBN 9781468605792 ISBN 9781468605808 DOI 10 4271 9781468605792 **The Sage Handbook of Social Network Analysis** John McLevey, John Scott, Peter J.
