REPERE Il s'agit pas d'infirmer le lien de causalité en médecine. Il s'agit juste de montrer que l'absence de lien est probable. C'est la même chose que de dire que l'absence de lien est probable, c'est la même chose que de dire que l'absence de lien est probable.

Abstract | This study explored the impact of coaching on students' self-efficacy and performance. The study was conducted with 100 students in a physical education class. The students were divided into two groups: a control group and an experimental group. The experimental group received coaching from a physical education teacher. The results showed that the experimental group had significantly higher self-efficacy and performance than the control group. The findings suggest that coaching can be an effective way to improve students' self-efficacy and performance.
