Part A—Seen Comprehension

Read the passage below and answers the questions 1—4 :—

“Globalization” has become a buzzword in the new era of international relations. Basically it is a process of expanding trade and commerce all over the world by creating a borderless market. But it has had a far reaching effect on many aspects of life. With the development of hi-tech communication media and rapid transportation facilities, the world has come closer. We can now learn in an instant what is happening in the farthest corner of the world and travel to any country in the shortest possible time. Countries of the world are like families in a village. They can even share their joys and sorrows like nextdoor neighbours. If one country is in distress, others can immediately come to its assistance. If we could build up an atmosphere of mutual understanding and co-operation through this globalization process, our world could certainly be a better place to live in.

8th Standard English Questions and Answers - Tamil Nadu State Board Syllabus Mukil E Publishing And Solutions Pvt Ltd, 8th Standard English Tamil Nadu State Board solutions guide For the first time in Tamil Nadu Technical books are available as ebooks Students and Teachers make use of it **Language Education in the School Curriculum** Ken Cruickshank, Stephen Black, Honglin Chen, Linda Tsung, Jan Wright, 2020-05-14 There is widespread concern in all English speaking countries at the rapid decline in study of languages. The promise of languages for all in the UK and North America in the 1970s marked a shift from languages as 'lite' subjects for the privileged few but this promise has not been fulfilled. This book explores the reasons for and solutions to this decline. More importantly it looks at how these trends have been reversed in successful school programs and the implications of this for language education policy makers. The study draws on an analysis of data from 600 primary secondary and community languages schools over six years and from detailed case studies in a representative sample of 45 successful schools. The book proposes a range of strategies to address the decline from engaging classroom learning assessment outcomes and embedding languages as central in school curriculum on the one level to a mix of incentives and mandation for language study especially at upper secondary school level. The authors explore the impact of learning languages on the thinking educational experiences and outcomes of young people across a range of ethnic backgrounds and socioeconomic statuses. They show the importance of having equal access to languages study in a world where young people will have increasingly more diverse working lives and argue that the gap in languages between policy and uptake is really a gap in the thinking of policy makers and government **Knowledge-building** Karl Maton, Susan Hood, Suellen Shay, 2015-10-08 Education and knowledge have never been more important to society yet research is segmented by approach methodology or topic. Legitimation Code Theory or LCT extends and integrates insights from Pierre Bourdieu and Basil Bernstein to offer a framework for research and practice that overcomes segmentalism. This book shows how LCT can be used to build knowledge about education and society. Comprising original papers by an

international and multidisciplinary group of scholars Knowledge building offers the first primer in this fast growing approach Through case studies of major research projects Part I provides practical insights into how LCT can be used to build knowledge by enabling dialogue between theory and data in qualitative research bringing together quantitative and qualitative methodologies in mixed methods research relating theory and practice in praxis conducting interdisciplinary studies with systemic functional linguistics Part II offers a series of studies of pressing issues facing knowledge building in education and beyond encompassing diverse subject areas including physics English cultural studies music and design educational sites schooling vocational education and higher education practices of research curriculum pedagogy and assessment both education and informal learning contexts such as museums and masonic lodges Carefully sequenced and interrelated these chapters form a coherent collection that gives a unique insight into one of the most thought provoking and innovative ways of building knowledge about knowledge building in education and society to have emerged this century This book is essential reading for all serious students and scholars of education sociology and linguistics
