

AUGER FILL FOR DRY FERTILIZER ATTACHMENT

An auger fill attachment is available for one point filling of all dry fertilizer attachments. This attachment is driven by a hydraulic motor with a safety shut-off valve located at the fill hopper.

To operate the auger fill attachment, proceed as follows:

58-80

Turn off tractor.

(Be certain safety valve on auger fill attachment is open.)

Start tractor and set speed indicator at 1200 rpm and operate auger fill attachment with remote cylinder operating lever.

IMPORTANT: Do not leave tractor engine running and attempt to start auger attachment with the safety valve. This could result in breaking the shear bolt which secures the auger to the hydraulic motor. The safety valve was designed for emergency shutoff only.

The auger fill mounts directly on the planter main frame, independent of the dry fertilizer attachment.

This allows the auger fill to be pivoted back for easy cleaning and servicing of the fertilizer hoppers. See Service pages 97 and 98. The fertilizer hopper lids can be placed on the hoppers with the auger fill in either position.

CAUTION: When using the auger fill attachment:

1. Keep all shields in place.
2. Disengage and shut off all engine and/or motor power before servicing or unclogging machine.
3. Keep hands, feet, and clothing away from power-driven parts.
