

Remove the distributor cap, then pull the rotor from the shaft and remove the dust cover. Wipe arm and cam clean. If breaker points are worn, pitted, or dirty, carefully remove both points and dress them to a smooth, flat surface using a fine hone. It is not necessary to remove pits; just be sure points are clean and flat. However, if points are badly pitted or worn, they should be replaced.

Install points and lubricate breaker cam with a trace of high-temperature wheel bearing grease. Place two or three drops of oil on felt pad in end of cam.

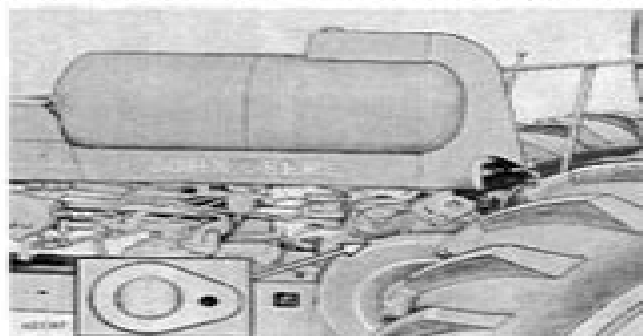

Turn flywheel until cam opens points to widest position. Adjust points to .012-inch clearance.

Replace dust cover and rotor. Wipe all dirt from cap and install it on distributor using a good gasket. Replace cables. Cable from outside terminal on distributor goes to spark plug on flywheel side of engine.

These simple operations will correct all ordinary ignition troubles. If no spark is obtained after these operations are completed, the unit should be taken to your John Deere dealer for checking and overhauling.

● INSTALLING AND TIMING DISTRIBUTOR ON LP-GAS TRACTOR ●

Installing the distributor after it has been removed from the tractor can be done easily as follows: First, remove the spark plug on the flywheel side. Place your finger over the hole and rotate the flywheel in the running direction until you feel a pressure of air in the cylinder. Continue turning the flywheel slowly until the "5° ATDC" mark, stamped on the flywheel rim, lines with the notches in the timing hole in the flywheel cover. In this position the slot in the coupling on the governor shaft will be horizontal.
