Last Resort Eric A. Posner, 2018-04-02 The bailouts during the recent financial crisis enraged the public They felt unfair and counterproductive people who take risks must be allowed to fail If we reward firms that make irresponsible investments costing taxpayers billions of dollars aren t we encouraging them to continue to act irresponsibly setting the stage for future crises And beyond the ethics of it was the question of whether the government even had the authority to bail out failing firms like Bear Stearns and AIG The answer according to Eric A Posner is no The federal government freely and frequently violated the law with the bailouts but it did so in the public interest An understandable lack of sympathy toward Wall Street has obscured the fact that bailouts have happened throughout economic history and are unavoidable in any modern market based economy And they re actually good Contrary to popular belief the financial system cannot operate properly unless the government stands ready to bail out banks and other firms During the recent crisis Posner argues the law didn t give federal agencies sufficient power to rescue the financial system The legal constraints were damaging but harm was limited because the agencies with a few exceptions violated or improvised elaborate evasions of the law Yet the agencies also abused their power If illegal actions were what it took to advance the public interest Posner argues we ought to change the law but we need to do so in a way that also prevents agencies from misusing their authority In the aftermath of the crisis confusion about what agencies did do should have done and were allowed to do has prevented a clear and realistic assessment and may hamper our response to future crises Taking up the common objections raised by both right and left Posner argues that future bailouts will occur Acknowledging that inevitability we can and must look ahead and carefully assess our policy options before we need them
