The field's leading authorities present essential information and tools for evaluating psychosocial, behavioral, situational, and medical factors in patients' subjective experience, functional impairment, and response to treatment. Empirically supported instruments and procedures are detailed, including self-report measures, observational techniques, psychophysiological measures, and more. Best practice recommendations are provided for assessing the most prevalent pain syndromes and for working with children, older adults, and people with communication difficulties. Updated throughout with DSM-5 diagnostic changes, new and updated instruments, current research, and increased attention to transdiagnostic concerns. Expanded coverage of obsessive-compulsive and related disorders. See also Clinical Handbook of Psychological Disorders, Sixth Edition, edited by David H. Barlow, which presents evidence-based treatments step by step.      Handbook of Child and Adolescent Psychology Treatment Modules Lara Jean Farrell, Rachael Murrihy, Cecilia A. Essau, 2023-08-17.
