Guide to Participatory Varietal Selection for Submergence-tolerant Rice T. R. Paris, 2011 The Green Revolution averted the threat of famine through the rapid adoption of improved rice varieties However despite this huge success hundreds of millions of poor rice farming families in rainfed areas still live in poverty and suffer from food rice insecurity Despite many released improved rice varieties for rainfed conditions farmers still use local varieties that can withstand drought and floods but have low yields or they use the same varieties for many years because of a lack of better varieties Rainfed rice farmers are slow to adopt improved varieties because of several problems One problem is more of extension than breeding many farmers particularly those living in remote rainfed areas may not have access to or information about the seed of new varieties Another problem is that variety testing programs are often conducted on station which does not represent farmers fields Moreover conventional rice breeding programs usually seek farmers input only at the very end of the process when newly released varieties usually one or two per year are evaluated in on farm demonstration trials Often in remote and unfavorable areas subsistence farmers who comprise the majority of the rural farming population in Asia give importance to social and cultural dimensions aside from the agronomic performance of the new rice varieties The complexities of developing acceptable varieties for variable and stressful rainfed environments require that breeders become deeply familiar with men and women farmers needs and preferences Since 1977 IRRI has been making efforts to improve communication among farmers breeders and extension workers so that men and women farmers concerns and preferences are considered in plant breeding objectives Participatory varietal selection PVS is a simple way for breeders and agronomists to learn which varieties perform well on station and on farm and to obtain feedback from the potential end users in the early phases of the breeding cycle It is a means for social scientists to identify the varieties that most men and women farmers prefer including the reasons for their preference and constraints to adoption Based on IRRI s experience in collaboration with national agricultural research and extension system partners and farmers PVS which includes researcher managed and farmer managed trials is an effective strategy for accelerating the dissemination of stress tolerant varieties PVS has also been instrumental in the fast release of stress tolerant varieties through the formal varietal release system This guide on PVS will complement the various training programs given by IRRI for plant breeders agronomists and extension workers engaged in rice varietal development and dissemination

Samuels, 2019-10-15 The prewar history of the Japanese intelligence community demonstrates how having power over much but insight into little can have devastating consequences Its postwar history one of limited Japanese power despite growing insight has also been problematic for national security In *Special Duty* Richard J Samuels dissects the fascinating history of the intelligence community in Japan Looking at the impact of shifts in the strategic environment technological change and past failures he probes the reasons why Japan has endured such a roller coaster ride when it comes to intelligence gathering and analysis and concludes that the ups and downs of the past century combined with growing uncertainties in the regional security environment have convinced Japanese leaders of the critical importance of striking balance between power and insight Using examples of excessive hubris and debilitating bureaucratic competition before the Asia Pacific War the unavoidable dependence on US assets and popular sensitivity to security issues after World War II and the tardy adoption of image processing and cyber technologies Samuels bold book highlights the century long history of Japan s struggles to develop a fully functioning and effective intelligence capability and makes clear that Japanese leaders have begun to reinvent their nation s intelligence community **Applications of Location Analysis** H. A. Eiselt, Vladimir Marianov, 2015-09-22 This book companion to *Foundations of Location Analysis* Springer 2011 highlights some of the applications of location analysis within the spheres of businesses those that deal with public services and applications that deal with law enforcement and first responders While the *Foundations* book reviewed the theory and first contributions this book describes how

different location techniques have been used to solve real problems Since many real problems comprise multiple objectives in this book there is more presence of tools from multicriteria decision making and multiple objective optimization The section on business applications looks at such problems as locating bank branches the potential location of a logistics park sustainable forest management and layout problems in a hospital a much more difficult type of problem than mere location problems The section on public services presents chapters on the design of habitats for wildlife control of forest fires the location of intelligent sensors along highways for timely emergency response locating breast cancer screening centers an economic analysis for the locations of post offices and school location The final section of the book includes chapters on the well known problem of locating fire stations a model for the location of sensors for travel time information the problem of police districting locations of jails location of Coast Guard vessels and finally a survey of military applications of location analysis throughout different periods of recent history
