F-82 Twin Mustang Pilot's Flight Operating Instructions

United States Air Force,USAF,2008-09-01 The F 82 Twin Mustang was conceived during WWII as a long range fighter escort

Like the P 51 it was designed by North American s brilliant engineer Edgar Schmued The F 82 utilized two extended P 51 fuselages mounted to a newly designed center wing and tail The plane incorporated new propeller assemblies and a unique four wheel landing gear In short while the plane would be cosmetically similar to the Mustang in reality it was an entirely new beast The F 82 wasn t ready before WWII ended but the program escaped cancellation and planes entered operational service in 1948 The F 82 became the last piston powered fighter ordered by the USAF It flew as an escort for SAC B 29s and with distinction as a night fighter in Korea It was retired in 1953 Originally printed by the USAF and North American this pilot s handbook provides a glimpse inside the cockpit of this warbird Originally classified Restricted the manual was declassified and is here reprinted in book form      List of Classes of United States Government Publications Available for Selection by Depository Libraries ,      Monthly Catalogue, United States Public Documents ,1991      **Monthly Catalog of United States Government Publications** ,1991-10
