Introduction

MyChron 3 660 is the new data acquisition system that AIM designed and developed only and expressly for Jr Drag Racers; a small, complete and high tech data acquisition system.
MyChron 3 660 stores run and not laps; each run includes a few seconds before your launch, your pass and your coast down.

Its configurable RPM graphic display, the two separate temperature inputs (cylinder head and exhaust gas), the magneto resistive speed sensor, several properly engineered firmware features and **Drag Analyzer**, the completely new data analysis software, make **MyChron 3 660** the best tool to monitor the dragster's engine as well as dragster and driver performances.
MyChron 3 660 records RPM, 2 temperature inputs and speed at a sampling rate of 20 Hertz per channel (20 times per second). This data can be retrieved at a later stage for analysis.

The logger records and displays the following parameters:

- 2 temperature inputs (cylinder head and exhaust gas);
- engine's RPM;
- jackshaft's RPM

Moreover, **MyChron 3 660**, calculates through its software and displays

- wheel speed in Mph;
- CVT;
- overdrive percentage;
- linear acceleration in G-forces;

All these parameters are legal following NHRA rules.

Data is stored in the 192 kbyte internal EEPROM memory that can record up to 50 runs. Stored data are downloadable to a PC through an USB cable You find as stock in the packaging of Your **MyChron 3 660**.

MyChron 3 660 is powered by an internal source, so You need 2 AAA Alkaline batteries to power it.
