Mikrotik Router Documentation:

Learn RouterOS Dennis M. Burgess,2010 **MikroTik Scripting** Nigel Bowden, MikroTik Scripting will teach you how to use the power of the MikroTik RouterOS scripting language to extend the functionality and support the administration of your MikroTik device We ll explore topics such as Automation of repetitive configuration tasks Executing administrative tasks at timed intervals Creating new functionality customised for your environment Interrogation and logging of performance and status information The book starts with the basics of scripting and progresses through an extensive range of topics allowing you to build run and debug scripts on our MikroTik device We ll explore questions such as What is scripting and how can it help me How do I create and run scripts on a MikroTik device What script creation workflow should I use What commands and syntax should I use to create scripts How can I debug my scripts As you explore each topic you ll create a series of scripts that increase in sophistication to reflect your growing scripting knowledge on your learning journey All scripts shown in this book are available for download from GitHub You ll be able to download a copy of each script and run it for yourself to see first hand how it works Each of the scripts you ll create is a software program written using the MikroTik scripting language Although this book isn t intended to teach you how to become a software developer it covers some of the basic concepts you ll need if you re not familiar with developing code Who is this book for This book is for anyone who wishes to learn how to create scripts for the MikroTik platform including Network engineers who are familiar with deploying MikroTik hardware and wish to create their own custom features for their network environment Network and software engineers who are involved with network automation and would like to automate tasks in their MikroTik environment Network operations departments who would like to automate alerts using self monitoring scripts on MikroTik devices If you ve been searching for a single resource to teach you how to create your own MikroTik scripts then you ll find MikroTik Scripting extremely useful It s also a valuable reference guide to keep on your bookshelf for future scripting work **Configuration for Wireless Network Based on Hotspot and CAPsMAN** Maya Sari,Azriel Christian Nurcahyo,2024-08-02 In the present scenario a growing need is stressed on having wireless networks both indoors and outdoors of diverse large environments like public areas corporate offices and government sectors schools and colleges Traditional network deployments on the other hand generally rely on either bridging or rather on the full CSS deployment method while often making use of NAT on every access point This causes interference with access points operating beyond the DHCP server lease limits with frequent loop issues arising within the wireless infrastructures Thus network administrators face the challenge of adding many simultaneous access points that do not have the ability to be integrated thus giving rise to numerous challenges in meeting demand with reliable networking solutions that provide quick distribution of vouchers or enable user registrations per ID especially during peak usage periods involving large numbers of users who are connected concurrently **Data Science Techniques for Beginner Network Administrators** Yulius Yus,Azriel Christian Nurcahyo,Heni Ermewaningsih,2024-08-12 There is an old

saying It is easier to wake someone who is sound asleep than to wake who is pretending to sleep As network administrators competing with AI systems in the future is not an impossibility Analyzing events with simple examples like comparing bandwidth throughput jitter and optimizing server resource usage can be exhausting when applied to dozens or hundreds of devices For instance how do we classify when the bandwidth is low in one place but normal elsewhere based on several sample events Or how do we classify which servers need maintenance and which do not based on existing data parameters referring to unsupervised and supervised learning Classification models can indeed simplify and optimize our work saving time compared to performing network maintenance one by one using only Google Colab In this context we have tried using a small of unsupervised and supervised learning to process data from simple network case studies These data are analyzed for classification regression and prediction using Python scripts implemented in Google Colab This book serves as a starting point to be developed into a continuous series extending to supervised learning deep learning and reinforcement learning which are still in the testing and writing phase We hope this new approach benefits network administrators wherever you are
