Elephants on Acid Alex Boese, 2011-03-21 Discover a world of outrageous experiments with the Sunday Times top ten bestseller *Elephants on Acid* Guided by Alex Boese's engaging storytelling unearth answers to questions that have tickled your curious mind from the unusual to the hilariously absurd Excellent accounts of some of the most important and interesting experiments in biology and psychology Simon Singh author of *The Code Book* A riveting look at historical experiments that challenge conventional thinking If left to their own devices would babies instinctively choose a well balanced diet Discover the secret of how to sleep on planes Which really tastes better in a blind tasting Coke or Pepsi Would your dog run to fetch help if you fell down a disused mineshaft What would happen if you gave an elephant the largest ever single dose of LSD *Elephants on Acid* humorously delves into these and more delivering a unique blend of popular psychology and historical science a fascinating insight into the bizarre world of scientific experiments **The First Brain** Oné R. Pagán, 2014-03-18 Planarians a class of flatworm are extraordinary they possess the remarkable ability to regenerate lost body parts including complete regeneration of the nervous system If cut into pieces each piece of the planarian can regenerate into a complete organism They are also unique among invertebrates in that they display addiction like behaviors to many drugs abused by humans Because of these distinct neurological traits the planarian is often used as an animal model in neurological research being used most recently for developments in neuropharmacology *The First Brain* is a discussion of how planarians have been used in neuropharmacology and what role they have played in scientific developments that have a high impact on our culture Planarians have been the animal models for research in drug addiction antidepressant development and various other topics in biology neurobiology and even zoology Pagán uses these flatworms as a framework to explore the history of biological research The book provides accessible background information on how biomedical research is impacted by evolution and defines neurobiology and neuropharmacology in ways that are easy to understand At the same time Pagán provides enough detail for the book to be useful for scientists working in various subsections of biology The planarian has played a key role in the history biological neuropharmacological and zoological research and has even made appearances in a few unexpected places in popular culture On Pagán explores all these roles and shows us why the planarian truly is one of the most extraordinary and influential organisms in scientific research today **Drunk Flies and Stoned Dolphins** One R. Pagan, 2021-11-16 From the cup of coffee that jumpstarts the day to dangerously addictive drugs the recreational use of plants with psychoactive properties has a long history among humans But as with many things it turns out that other animals got there first From parrots to primates consuming medicinal chemicals is an instinctive behavior that helps countless organisms fight infection and treat disease But the similarities don't end there Like us many creatures also consume substances that have no apparent benefit except for inducing intoxication In fact animals have been using drugs for recreational purposes since prehistoric times We may even have animals to thank for the idea legend says that coffee was

discovered by observing the behavior of goats that had eaten it In his previous book *Strange Survivors* author and biologist R. Pagan introduced readers to some of the truly bizarre strategies animals use to survive in the cutthroat world of natural selection Now in *Drunk Flies and Stoned Dolphins* he sheds light on the surprising cravings they indulge when it's time to unwind In this book you'll get an eye-opening glimpse into the mind-altering behavior of the non-human members of the animal kingdom spanning insects to elephants including the dolphin species that apparently likes to pass around an intoxicating pufferfish as if they were sharing a joint Combining fascinating science with humor and enthusiasm Pagan's latest is full of the kind of unforgettable stories and odd facts that you'll find yourself repeating to everyone you meet From fruit fly happy hour to the evolutionary reasons behind nature's drugs *Drunk Flies and Stoned Dolphins* takes you on a trip through the colorful world of animal intoxication and along the way explores what this science reveals about the surprising connections between all the world's creatures

*Geek Monthly*, 2008-03 [Travels With Casey Benoit](#)  
Denizet-Lewis, 2015-07-21 Over four months 32 states and 13 000 miles in a rented motor home Denizet Lewis and his canine companion attempt to pay tribute to the most powerful interspecies bond there is in the country with the highest rate of dog ownership in the world On the way Denizet Lewis known for his deeply reported dispatches from far corners of American life meets an irresistible cast of dogs and dog-obsessed humans

*How to Make a Tornado* New Scientist, 2016-09-01 Science tells us grand things about the universe how fast light travels and why stones fall to earth But scientific endeavour goes far beyond these obvious foundations There are some fields we don't often hear about because they are so specialised or turn out to be dead ends Yet researchers have given hallucinogenic drugs to blind people seriously tried to weigh the soul as it departs the body and planned to blast a new Panama Canal with atomic weapons Real scientific breakthroughs sometimes come out of the most surprising and unpromising work *How to Make a Tornado* is about the margins of science not the research down-tried and tested routes but some of its zanier and more brilliant by-ways Investigating everything from what it's like to die to exploding trousers and recycled urine this book is a reminder that science is intensely creative and often very amusing and when their minds run free scientists can fire the imagination like nobody else

**School Library Journal** ,2007 Extra Sensory Brian Clegg, 2024-03-26 Extra Sensory is a pop science look at the untapped abilities of human beings from ESP to Telekenesis and other real life sciences that are currently being studied today from physicist Brian Clegg We d all love to have psi abilities like telepathy telekinesis and remote viewing But is there any solid evidence to back up these talents or are they nothing more than fantasy We still only understand a small percentage of the capabilities of the human brain and we shouldn t dismiss such potential powers out of hand Although there is no doubt that many who claim these abilities are frauds and no one has yet won James Randi s 1M prize for demonstrating ESP under lab conditions we still have a Nobel prize winner suggesting a mechanism for telepathy serious scientists researching the field and university projects that produced potentially explosive results What s the verdict By looking at possible physical mechanisms for ESP and taking in the best scientific evidence the reader can discover if this is all wishful thinking and deception or a fascinating reality The truth is out there

**Electrified Sheep** Alex Boese, 2012-06-05 Perfect summertime reading preferably with a friend nearby who can be constantly interrupted with unsettling facts Daily Mail UK Benjamin Franklin was a pioneering scientist leader of the Enlightenment and a founding father of the United States But perhaps less well known is that he was also the first person to use mouth to mouth resuscitation on an electric shock victim Odder still it was actually mouth to beak resuscitation on a hen that he himself had shocked Welcome to some of the weirdest and most wonderful experiments ever conducted in the name of science Filled with

stories of science gone strange Electrified Sheep is packed with eccentric characters irrational obsessions and extreme experiments Watch as scientists attempt to nuke the moon wince at the doctor who performs a self appendectomy and catch the faint whiff of singed wool from an electrified sheep *Attack of the Killer Facts!* Eric Gryzmkowski,2011-04-18 Factoid Attack Inherent sadistic streak in dentists confirmed The electric chair was invented by a dentist Dr Alfred Southwick Not surprising dentists have been perfecting torture devices for centuries Factoid Attack Galaxy at risk Intelligent life in short supply In 1961 Astronomer Frank Drake estimated the number of probable intelligent civilizations inhabiting our galaxy Using conservative numbers that estimate came to 10 000 Unfortunately we are not included in that total Factoid Attack Colorblind bulls hate all matadors equally The color of a matador s cape or muleta is traditionally red which is widely believed to irritate the bull In reality bulls are colorblind so it is irrelevant what color cape a matador uses to antagonize them Shot in the dark but maybe it s the being stabbed with swords bit that pisses them off Forget Fringe Warehouse 13 and The X Files In this book you ll find more weird and wacko truths than in all those combined From golden poison dart frogs with enough venom to kill ten grown humans to cockroaches that can survive radiation 15 times stronger than what kills people scary and strange just got scarier and stranger **Potomkowie Frankenstein**a Alex Boese,2008 □ □ □ □ □ □ □ □ □ □ R. □ □,2024-06-26 *Exercised* Daniel E. Lieberman,2021-12-07 If exercise is healthy so good for you why do many people dislike or avoid it These engaging stories and explanations will revolutionize the way you think about exercising not to mention sitting sleeping sprinting weight lifting playing fighting walking jogging and even dancing Strikes a perfect balance of scholarship wit and enthusiasm Bill Bryson New York Times best selling author of The Body If we are born to walk and run why do most of us take it easy whenever possible Does running ruin your knees Should we do weights cardio or high intensity training Is sitting really the new smoking Can you lose weight by walking And how do we make sense of the conflicting anxiety inducing information about rest physical activity and exercise with which we are bombarded In this myth busting book Daniel Lieberman professor of human evolutionary biology at Harvard University and a pioneering researcher on the evolution of human physical activity tells the story of how we never evolved to exercise to do voluntary physical activity for the sake of health Using his own research and experiences throughout the world Lieberman recounts without jargon how and why humans evolved to walk run dig and do other necessary and rewarding physical activities while avoiding needless exertion Exercised is entertaining and enlightening but also constructive As our increasingly sedentary lifestyles have contributed to skyrocketing rates of obesity and diseases such as diabetes Lieberman audaciously argues that to become more active we need to do more than medicalize and commodify exercise Drawing on insights from evolutionary biology and anthropology Lieberman suggests how we can make exercise more enjoyable rather than shaming and blaming people for avoiding it He also tackles the question of whether you can exercise too much even as he explains why exercise can reduce our vulnerability to the diseases mostly likely to make us sick and kill us
