France, Bernhard Rumpe, 2003-07-31 This book constitutes the refereed proceedings of the Second International Conference on the Unified Modeling Language UML 99 held in Fort Collins CO USA in September 1999 The 44 revised full papers presented together with two invited contributions and three panel summaries were carefully reviewed and selected from a total of 166 submissions. The papers are organized in topical sections on software architecture UML and other notations formalizing interactions meta modeling tools components UML extension mechanisms process modeling real time systems constraint languages analyzing UML models precise behavioral modeling applying UML sequence design and coding Principles of Biomedical Informatics Ira J. Kalet, 2013-09-26 This second edition of a pioneering technical work in biomedical informatics provides a very readable treatment of the deep computational ideas at the foundation of the field Principles of Biomedical Informatics 2nd Edition is radically reorganized to make it especially useable as a textbook for courses that move beyond the standard introductory material It includes exercises at the end of each chapter ideas for student projects and a number of new topics such as tree structured data interval trees and time oriented medical data and their use On Line Application Processing OLAP an old database idea that is only recently coming of age and finding surprising importance in biomedical informatics a discussion of nursing knowledge and an example of encoding nursing advice in a rule based system X ray physics and algorithms for cross sectional medical image reconstruction recognizing that this area was one of the most central to the origin of biomedical computing an introduction to Markov processes and an outline of the elements of a hospital IT security program focusing on fundamental ideas rather than specifics of system vulnerabilities or specific technologies It is simultaneously a unified description of the core research concept areas of biomedical data and knowledge representation biomedical information access biomedical decision making and information and technology use in biomedical contexts and a pre eminent teaching reference for the growing number of healthcare and computing professionals embracing computation in health related fields As in the first edition it includes many worked example programs in Common LISP the most powerful and accessible modern language for advanced biomedical concept representation and manipulation The text also includes humor history and anecdotal material to balance the mathematically and computationally intensive development in many of the topic areas The emphasis as in the first edition is on ideas and methods that are likely to be of lasting value not just the popular topics of the day Ira Kalet is Professor Emeritus of Radiation Oncology and of Biomedical Informatics and Medical Education at the University of

Washington Until retiring in 2011 he was also an Adjunct Professor in Computer Science and Engineering and Biological Structure From 2005 to 2010 he served as IT Security Director for the University of Washington School of Medicine and its major teaching hospitals He has been a member of the American Medical Informatics Association since 1990 and an elected Fellow of the American College of Medical Informatics since 2011 His research interests include simulation systems for design of radiation treatment for cancer software development methodology and artificial intelligence applications to medicine particularly expert systems ontologies and modeling Develops principles and methods for representing biomedical data using information in context and in decision making and accessing information to assist the medical community in using data to its full potential Provides a series of principles for expressing biomedical data and ideas in a computable form to integrate biological clinical and public health applications Includes a discussion of user interfaces interactive graphics and knowledge resources and reference material on programming languages to provide medical informatics programmers with the technical tools to develop systems Geographic Uncertainty in Environmental Security Ashley Morris, Svitlana Kokhan, 2007-09-14 On June 28 through July 1 2006 a NATO advanced research workshop was held in Kyiv Ukraine This meeting of scholars from both NATO and NATO partner countries brought together the leading researchers in the field of Fuzziness and Uncertainty in GIS for Environmental Security and Protection The papers based upon the presentations at this meeting are included in this book They were all quite good some focusing on the use of fuzzy sets in geography others focusing on explicit environmental concerns in Ukraine What this book cannot show is the camaraderie and spirit of cooperation that permeated the atmosphere of this workshop These researchers many of whom had never met before are now colleagues and are continuing to collaborate on research to this day and probably beyond Scholars from various positions and countries have chosen to work together in the spirit of cooperation to make the ideas presented in this book come to fruition At press time we do not know if Ukraine will become a NATO member or not In any case the editors wish to thank the NATO Science Committee for their funding encouragement and work in making this workshop a reality We hope that the spirit of cooperation and intellectual curiosity that was so lively at the conference will encourage the reader in the perusal of this work Advances in Object-oriented Data Modeling M. Papazoglou, S. Spaccapietra, Zahir Tari, 2000 This book focuses on recent developments in representational and processing aspects of complex data intensive applications Until recently information systems have been designed around different business functions such as accounts payable and inventory control Object oriented modeling in contrast structures systems around the data the objects that make up the various business functions Because information about a particular function is limited to one place to the object the system is shielded from the effects of change Object oriented modeling also promotes better understanding of requirements clear designs and more easily maintainable systems. This book focuses on recent developments in representational and processing aspects of complex data intensive applications. The chapters cover hot topics such as application behavior and consistency reverse

engineering interoperability and collaboration between objects and work flow modeling Each chapter contains a review of its subject followed by object oriented modeling techniques and methodologies that can be applied to real life applications Contributors F Casati S Ceri R Cicchetti L M L Delcambre E F Ecklund D W Embley G Engels J M Gagnon R Godin M Gogolla L Groenewegen G S Jensen G Kappel B J Kr mer S W Liddle R Missaoui M Norrie M P Papazoglou C Parent B Perniei P Poncelet G Pozzi M Schreft R T Snodgrass S Spaccapietra M Stumptner M Teisseire W J van den Heuevel S N Woodfield

nature and easy to navigate structure makes it a resource that students and professionals will turn to throughout their Information Networks and Data Communication Finn Arve Aagesen, Harald Botnevik, Dipak Khakhar, 2016-01-09 careers Teleservice is a common concept for distributed application services related to the use of telecommunication equipment PCs workstations and mainframes Teleservices represent a diversity of applications related to various user and vendor cultures such as traditional telecommunications services E mail services cooperative work applications multimedia applications mobile services and intelligent network services The complexity and diversity of teleservices are increasing but of greater importance is the change in the way in which teleservices are designed delivered and maintained Information Network and Data Communications captures the cultural as well as the technical variety of teleservice Effective Databases for Text & Document Management Shirley A. Becker, 2003-01-01 Focused on the latest research on text and document management this guide addresses the information management needs of organizations by providing the most recent findings How the need for effective databases to house information is impacting organizations worldwide and how some organizations that possess a vast amount of data are not able to use the data in an economic and efficient manner is demonstrated A taxonomy for object oriented databases metrics for controlling database complexity and a guide to accommodating hierarchies in relational databases are provided Also covered is how to apply Java triggers for X Link management and how to build signatures

Advanced Database Systems Carlo Zaniolo,1997-05 The database field has experienced a rapid and incessant growth since the development of relational databases The progress in database systems and applications has produced a diverse landscape of specialized technology areas that have often become the exclusive domain of research specialists Examples include active databases temporal databases object oriented databases deductive databases imprecise reasoning and queries and multimedia information systems This book provides a systematic introduction to and an in depth treatment of these advanced database areas It supplies practitioners and researchers with authoritative coverage of recent technological advances that are shaping the future of commercial database systems and intelligent information systems Advanced Database Systems was written by a team of six leading specialists who have made significant contributions to the development of the technology areas covered in the book Benefiting from the authors long experience teaching graduate and professional courses this book is designed to provide a gradual introduction to advanced research topics and includes many examples and exercises to support its use for individual study desk reference and graduate classroom teaching
