Kenya has been the object of much controversy among students of African politics Some view it as one of the greatest successes of the post independence period others see it as an example of all that is wrong with African development Henry Bienen approaches this controversy by asking whether the concept of political participation has been properly understood in the African context His case study of political participation in Kenya discusses administration party politics ethnicity and class He suggests that in a system dominated by elites individuals and groups exert influence primarily through patron client networks and local administrative and party organs Local politics is the most important arena for most people it is argued As long as the regime adopts policies which maximize economic growth and take account of peasant middle and small holders and as long as individual representatives can be replaced even though no change of regime occurs limited political participation leads to political stability Originally published in 1974 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 What Brexit Means Max Horder, 2024-12-06 What Brexit Means explores the rise of populism in Britain Drawing on several years of ethnographic fieldwork amongst ideologically committed Brexit activists it examines the discourse of populism across language culture politics psychology and cognition It explains how populism is expressed in terms of ritually renewing social order and solidarity Rejecting the notion that the territory of populism studies belongs to political science this book shows

how it is in the realm of anthropology myth ritual alterity consciousness selfhood that we witness the most compelling examples of how a phenomena as modern as populism depends upon the same symbolic logics that we find in the premodern world What Brexit Means is a demonstration of the power of anthropology to explain momentous and poorly predicted transformations in the global order It will become a benchmark text for those eager for anthropology s contribution to understanding the political turbulence that is rocking the stability of Western democracies

Decolonization and Conflict Martin Thomas, Gareth Curless, 2017-06-15 Insurgency based irregular warfare typifies armed conflict in the post Cold War age For some years now western and other governments have struggled to contend with ideologically driven guerrilla movements religiously inspired militias and systematic targeting of civilian populations Numerous conflicts of this type are rooted in experiences of empire breakdown Yet few multi empire studies of decolonisation s violence exist Decolonization and Conflict brings together expertise on a variety of different cases to offer new perspectives on the colonial conflicts that engulfed Europe s empires after 1945 The contributors analyse multiple forms of colonial counter insurgency from the military engagement of anti colonial movements to the forced removal of civilian populations and the application of new doctrines of psychological warfare Contributors to the collection also show how insurgencies their propaganda and methods of action were inherently transnational and inter connected The resulting study is a vital contribution to our understanding of contested decolonization It emphasises the global connections at work and reveals the contemporary resonances of both anti colonial insurgencies and the means devised to counter them It is essential reading for students and scholars of empire decolonization and asymmetric warfare **Guidance on integrated pest**

Okia,2019-08-23 This book advances research into the government forced labor used widely in colonial Kenya from 1930 to 1963 after the passage of the International Labor Organization s Forced Labour Convention While the 1930 Convention intended to mark the suppression of forced labor practices various exemptions meant that many coercive labor practices continued in colonial territories Focusing on East Africa and the Kenya Colony this book shows how the colonial administration was able to exploit the exemption clause for communal labor thus ensuring the mobilization of African labor for infrastructure development As an exemption communal labor was not defined as forced labor but instead justified as a continuation of traditional African and community labor practices Despite this ideological justification the book shows that communal labor was indeed an intensification of coercive labor practices and one that penalized Africans for non compliance with fines or imprisonment The use of forced labor before and after the passage of the Convention is examined with a focus on its use during World War II as well as in efforts to combat soil erosion in the rural African reserve areas in Kenya The exploitation of female labor the Mau Mau war of the 1950s civilian protests and the regeneration of communal labor as harambee after independence are also discussed **Provision of Psychosocial Support and Education of Vulnerable**

Heart Defects Antonio F. Corno,Elisabeth M.W.J. Utens,2018-02-07 *Interactive Feedbacks between Soil Fauna and Soil Processes* Maria Luz Cayuela,Julia Clause,Jan Frouz,Philippe C. Baveye,2020-03-30 Soil fauna plays a significant role at all trophic levels of the soil food web and regulates processes that are crucial for soil functioning such as nutrient cycling

immobilization and or degradation of toxic compounds formation of soil structure greenhouse gas emissions and C turnover Although soil fauna is not thought to contribute significantly to soil respiration during litter or soil organic matter SOM decomposition the diversity of soil fauna has been found to strongly influence SOM distribution and dynamics Yet the functional contribution of soil fauna to many soil processes is not well understood due to methodological limitations and the high complexity of interactions at various spatiotemporal scales In general soil fauna has received far less scientific attention than bacteria and fungi and lately archaea in soil studies and has been regularly ignored in global biogeochemical models with maybe exceptions for some earthworms However recent studies are raising the awareness of the influence of soil fauna on ecosystems dynamics For instance earthworms have been found to be major players in N₂O emissions from soils They exert a strong influence on C stabilization and they promote the degradation of polycyclic aromatic hydrocarbons PAHs Less studied ants and termites have been found to increase crop productivity in drylands and different lifeforms of Collembola have been shown to impact microorganisms in various ways over time thereby potentially affecting C and N cycles within farming systems The influence of soil fauna indeed manifests over a broad ranges of spatiotemporal scales For example some effect such as aggregate formation may cumulate over time and finally contribute to the formation of whole soil profiles which serve as a framework for other soil processes such as water movement decomposition etc Meanwhile soil biodiversity is impacted by an increasing human pressure through deforestation agriculture intensification habitat fragmentation or climate change increasing temperatures extreme weather events which leads to soil biodiversity loss in particular of soil fauna with associated consequences on soil functioning and resilience
