

## Economic Essay

The study of economics is based upon needs and wants of an individual and three factors determine how an economy functions; consuming, producing and the sale of goods and services. The source states that the government is unable to heal the wounds of the economic body. The method to solving any economic issue is in the hands of the producers and consumers. Adam Smith – the father of capitalism whom sits on the right side of the spectrum would support the idea that the producer and consumer control the stability of the economy. However, John Maynard Keynes, an opponent of Adam Smith whom is placed on the left side of the spectrum would not embrace the ideas that the source suggests. He would argue that government intervention is necessary for an economy to recover from a depression. Individuals should embrace this source and ideas of capitalism to a degree because it is possible for government intervention to resolve issues and allow the economy a chance for a full recovery.

An ideology that does not involve government intervention and is based on laissez-faire is known as Capitalism. It was created by Adam Smith – the father of Capitalism as a result of this ideology, a metaphor known as the Invisible Hand Theory was developed. He felt that in a society, producers and consumers as individuals should control the economy in which the Invisible Hand Theory states that an individual will pursue their own self-interest, in doing so it will indirectly benefit the community. A common example of this would be a shoemaker would make shoes for a baker (who was good at making bread, but not at shoes). This would be much more productive for an economy opposed to each individual making his/her own bread and shoes. If consumers didn't want shoes, they would demand fewer shoes, and the shoemaker

**Money in a Free Society** Tim Congdon, 2011-11-01 In the 15 years to mid 2007 the world economy enjoyed unparalleled stability the so called Great Moderation with steady growth and low inflation But the period since mid 2007 the Great Recession has seen the worst macroeconomic turmoil since the 1930s A dramatic plunge in trade output and employment in late 2008 and 2009 has been followed by an unconvincing recovery How is the lurch from stability to instability to be explained What are the intellectual origins of the policy mistakes that led to the Great Recession What theories motivated policies in the USA and other leading nations Which ideas about economic policy have proved right And which have been wrong Money in a Free Society contains 18 provocative essays on

these questions from Tim Congdon an influential economic adviser to the Thatcher government in the UK and one of the world's leading monetary commentators Congdon argues that academic economists and policy makers have betrayed the intellectual legacy of both Keynes and Friedman These two great economists believed in somewhat different ways in the need for steady growth in the quantity of money But Keynes has been misunderstood as advocating big rises in public spending and large budget deficits as the only way to defeat recession That has led under President Obama to an unsustainable explosion in American public debt Meanwhile the Fed has ignored extreme volatility in the rate of money growth contrary to the central message of Friedman's analytical work In his 1923 Tract on Monetary Reform Keynes said The Individualistic Capitalism of today precisely because it entrusts saving to the individual investor and production to the individual employer presumes a stable measuring rod of value and cannot be efficient perhaps cannot survive without one In Money in a Free Society Congdon calls for a return to stable money growth and sound public finances and argues that these remain the best answers to the problems facing modern capitalism
