Essential Questions On Poetry:

Basic Questions of Philosophy Martin Heidegger, 1994-06-22 This excellent translation presents Heidegger's mature thought on the essence of Truth as he was writing his major work *Contributions to Philosophy* Library Journal This is the first English translation of a lecture course Martin Heidegger presented at the University of Freiburg in 1937-1938 Heidegger's task here is to reassert the question of the essence of truth not as a problem or as a matter of logic but precisely as a genuine philosophical question in fact the one basic question of philosophy Thus this course is about the essence of truth as well as the essence of philosophy itself On both sides Heidegger draws extensively upon the ancient Greeks on their understanding of truth as *aletheia* and their determination of the beginning of philosophy as the disposition of wonder In addition these lectures were presented at the time that Heidegger was composing his second magnum opus *Beiträge zur Philosophie* and provide the single best introduction to that complex and crucial text

Thinking and Learning through Children's Literature Miriam G. Martinez, Junko Yokota, Charles Temple, 2017-04-18 Much of teachers attention these days is focused on having students read closely to ferret out the author's intended meaning and the devices used to convey that meaning But we cannot forget to guide students to have moving engagements with literature because they need to make strong personal connections to books of merit if they are to become the next generation of readers literate people with awareness of and concern for the diversity of human beings around them and in different times and places Fortunately guiding both students personal engagement with literature and their close reading to appreciate the author's message and craft are not incompatible goals This book enthusiastically and intelligently addresses both imperatives first surveying what

is gained when students are immersed in literature then celebrating and explicating the main features of literature students need to understand to broaden their tastes and deepen their engagement at the same time they meet external standards then presenting a host of active methods for exploring all major genres of children's books and finally presenting suggestions for interdisciplinary teaching units grounded in literature Created by noted leaders in the fields of children's literature and literacy the book is enlivened by recurring features such as suggested reading lists issues for discussion links to technology and annotations of exemplary books
