Essential Management Skills For Young Entrepreneurs In Ghana:

Young Entrepreneurs in Sub-Saharan Africa Katherine V. Gough, Thilde Langevang, 2016-03-02 Young people in sub-Saharan Africa are growing up in rapidly changing social and economic environments which produce high levels of unemployment and underemployment. Job creation through entrepreneurship is currently being promoted by international organizations, governments and NGOs as a key solution despite there being a dearth of knowledge about youth entrepreneurship in an African context. This book makes an important contribution by exploring the nature of youth entrepreneurship in Ghana, Uganda and Zambia. It provides new insights into conceptual and methodological discussions of youth entrepreneurship as well as presenting original empirical data. Drawing on quantitative and qualitative research conducted under the auspices of a collaborative interdisciplinary and comparative research project, it highlights the opportunities and challenges young people face in setting up and running businesses. Divided into a number of clear sections, each with its own introduction and conclusion, the book considers the nature of youth entrepreneurship at the national level in both urban and rural areas in specific sectors including mobile telephony, mining, handicrafts and tourism, and analyses how key factors such as microfinance, social capital and entrepreneurship education affect youth entrepreneurship. New light is shed on the multifaceted nature of youth entrepreneurship and a convincing case is presented for a more nuanced understanding of the term entrepreneurship and the situation faced by many African youth today. This book will be of interest to a wide range of scholars interested in youth entrepreneurship including in development studies, business studies, youth studies and geography, as well as to development practitioners and policy makers. Building a Green Future Through Essential Decision-Making Competencies Duhaček Šebestová, Jarmila, Popescu, Cristina Raluca Gh., 2025-05-08 In today's evolving world, sustainable solutions have become an urgent need. As organizations face pressing environmental challenges, the decisions made will shape the future of our planet. Individuals, organizations and governments must continue to navigate complex sustainability issues. By honing key decision-making competencies like systems thinking, long-term planning and ethical responsibility, organizations can foster a collective shift toward greener practices. This approach addresses environmental concerns while empowering decision makers to make impactful changes, ensuring a healthier, more resilient future for generations to come. *Building a Green Future Through Essential Decision Making Competencies* explores the key decision-making skills required to address complex environmental challenges, focusing on strategies like systems thinking, risk assessment and stakeholder collaboration. It examines how these competencies can be applied across various sectors to promote sustainable practices, mitigate environmental impact and guide the transition toward a more eco-conscious society. This book covers topics such as human rights, sustainable development and traffic monitoring and is a useful resource for business owners, economists, academicians, researchers and scientists.
