Land, Power, and the Sacred Janet R. Goodwin, Joan R. Piggott, 2018-07-31 Landed estates sh en produced much of the material wealth supporting all levels of late classical and medieval Japanese society During the tenth through sixteenth centuries estates served as sites of de facto government trade network nodes developing agricultural technology and centers of religious practice and ritual Although mostly farmland many yielded nonagricultural products including lumber salt fish and silk and provided livelihoods for craftsmen seafarers peddlers and performers as well as for cultivators By the twelfth century an estate system permeated much of the Japanese archipelago This volume examines the system from three perspectives the land itself the power derived from and exerted over the land and the religion institutions and individuals that were involved in landholding practices Chapters by Japanese and Western scholars explore how the estate system arose developed and eventually collapsed Several investigate a single estate or focus on agricultural techniques while others survey estates in broad contexts such as economic change and maritime trade Other chapters look at how we learn about estates by inspecting documents landscape features archaeological remains and extant buildings and images how representatives of every social stratum worked together to make the land productive and conversely how cooperative arrangements failed and rivals battled one another making conflict as well as collaboration a hallmark of the system On a more personal level we follow the monk Ch gen s restoration of be Estate and his installation of a famous Amida triad in a temple he built on the premises the strategies of royal ladies J saimon in Hachij in and K kamon in as they strove to keep their landholdings viable and the murder of estate official Gor zaemon whose own neighbors killed him as a result of a much larger dispute between two powerful warrior families Land Power and the Sacred represents a significant expansion and revision of our knowledge of medieval Japanese estates A range of readers will welcome the primary source research and comparative perspectives it offers those who do not specialize in Japanese medieval history but recognize the value of teaching the history of estates will find a chapter devoted to the topic invaluable Contributors and translators Kristina

Governing the World? Thomas G Weiss, 2015-11-17 Problems posed by Syria's chemical weapons attacks Egypt's ouster of an elected government and myriad other global dilemmas beg the question of whether and how the world can be governed The challenge is addressing what former UN Secretary General Kofi Annan called Problems without Passports environmental economic humanitarian and political crises that threaten stability prosperity and even human survival Everything is globalized everything except politics which remain imprisoned behind national borders The world has changed but our basic way of managing it has not We pursue fitful tactical short term and local responses for actual or looming threats that require sustained strategic longer run and global actions With clarity and passion Thomas G Weiss argues for a diversity of organizational arrangements some centralized some decentralized and a plurality of problem solving strategies some worldwide some local He proposes a three pronged strategy the expansion of the formidable amount of practical global governance that already exists the harnessing of political and economic possibilities opened by the communications revolution and the recommitment by states to a fundamental revamping of the United Nations

Making Sense of World History Rick Szostak, 2020-10-22. Making Sense of World History is a comprehensive and accessible textbook that helps students understand the key themes of world history within a chronological framework stretching from ancient times to the present day. To lend coherence to its narrative, the book employs a set of organizing devices that connect times, places, and/or themes. This narrative is supported by flowcharts that show how phenomena within diverse broad themes interact in generating key processes and events in world history. A discussion of the common challenges faced by different types of agent, including rulers, merchants, farmers, and parents, and a comparison of how these challenges were addressed in different times and places. An exhaustive and balanced treatment of themes such as culture, politics, and economy with an emphasis on interaction. Explicit attention to skill acquisition in organizing information, cultural sensitivity, comparison, visual literacy, integration, interrogating primary sources, and critical thinking. A focus on historical episodes that are carefully related to each other. Through the use of such devices, the book shows the cumulative effect of thematic interactions through time, communicates the many ways in which societies have influenced each other through history, and allows us to compare and contrast how they have reacted to similar challenges. They also allow the reader to transcend historical controversies and can be used to stimulate class discussions and guide student assignments. With a unified authorial voice and offering a narrative from the ancient to the present, this is the go-to textbook for World History courses and students.
