Early Childhood Development Bilal Iqbal Avan, 2008 Despite the wide array of theoretical frameworks and research in the discipline of child development there is dearth of guidance to implement that knowledge in real world settings The book bridges the gap between theory and practice and successfully presents the integration of psychology sociology and public health of early childhood development in the much needed cross cultural context of the developing countries The book takes this interdisciplinary approach a step further and provides a detailed account to conceptualize and implement community

based programmes to achieve optimal early childhood development The text is developed on the belief that organised effort to ensure a better future for our children requires a basic understanding of principles of their growth and development and skills to scientifically observe them This book will help child development practitioners advocates students and even caregivers who need further understanding for their individual and collective endeavours The first section describes the domains of child development while highlighting the importance of social environment The second section emphasizes assessment and observation of different aspects of child development the third section gives guidelines to implement initiatives that can ensure a child s survival optimum growth and development at neighbourhood and community level The final section is focused on the training needs of the themes cross referenced throughout the book

Be a Modern Teacher with Emotional Intelligence Alozie Eugene Iheanyi, 2015-08-25 In the past ten years of pastoral vocation as a Catholic Priest I have dedicated not less than eight years in apostolates intrinsically tied to mentoring of young people and classroom teaching After completing my bachelors degree I worked for six years as a secondary school principal in Nigeria before I received the call to come over to Europe for the continuation of my ministerial experience and learning In all these years both from studies and in practical experience I have realized that education is meant to enhance the lives of people and improve them In the course of researching for my Masters degree I became aware of the concept of emotional intelligence I saw in it an apt and timely addendum to the entire course of research and to educational research in particular The fact is that human life its reality and goals is the very context inside which learning should be done and for which learning is done This is what makes education have meaning and determines its usefulness and it is only in this context that we can say that education prepares one for life and its challenges Directly or indirectly emotional intelligence makes a contribution to preparation for living in the modern world Educational enterprise is not exclusive to the activities that take place within the four walls of a formal classroom I accept the educational learning theory which says that learning is everywhere for a conscious mind though it always needs to be tuned and guided In fact there are a huge number of para teachers such as parents coaches mentors pastors inspirers trainers and leaders who do not know the extent to which their day to day teachings and drilling of others affect the psychology of society at large This is because the teaching mentoring and coaching of such para teachers influences the emotional intelligence of their followers and learners most often in a positive way Emotional intelligence was a ground breaking theory developed by Daniel Goleman not only on to teach how best to teach and inspire but also to make an important link between the learning achievement of the classroom and success in real life situations This is called knowledge transfer in education
