Prothero, 2018-01-02 Every rock is a tangible trace of the earth s past *The Story of the Earth in 25 Rocks* tells the fascinating stories behind the discoveries that shook the foundations of geology In twenty five chapters each about a particular rock outcrop or geologic phenomenon Donald R Prothero recounts the scientific detective work that shaped our understanding of geology from the unearthing of exemplary specimens to tectonic shifts in how we view the inner workings of our planet Prothero follows in the footsteps of the scientists who asked and answered geology s biggest questions How do we know how old the earth is What happened to the supercontinent Pangea How did ocean rocks end up at the top of Mount Everest What can we learn about our planet from meteorites and moon rocks He answers these questions through expertly chosen case studies such as Pliny the Younger s firsthand account of the eruption of Vesuvius the granite outcrops that led a Scottish scientist to theorize that the landscapes he witnessed were far older than Noah s Flood the salt and gypsum deposits under the Mediterranean Sea that indicate that it was once a desert and how trying to date the age of meteorites revealed the dangers of lead poisoning Each of these breakthroughs filled in a piece of the greater puzzle that is the earth with scientific discoveries dovetailing with

Nash,Erin L. Baxter,2023-04-07 Pushing

Boundaries in Southwestern Archaeology draws together the proceedings from the sixteenth biennial Southwest Symposium. In exploring the conference theme contributors consider topics ranging from the resuscitation of archaeomagnetic dating to the issue of Athapaskan origins from collections based studies of social identity foodways and obsidian trade to the origins of a rock art tradition and the challenges of a deeply buried archaeological record. The first of the volume's four sections examines the status history and prospects of Bears Ears National Monument the broader regulatory and political boundaries that complicate the nature and integrity of the archaeological record and the cultural contexts and legal stakes of archaeological inquiry. The second section focuses on chronological big data in the context of pre-Columbian history and the potential and limits of what can be empirically derived from chronometric analysis of the past. The chapters in the third section advocate for advancing collections based research focusing on the vast and often untapped research potential of archives previously excavated museum collections and legacy data. The final section examines the permeable boundaries involved in Plains Pueblo interactions obvious in the archaeological record but long in need of analysis interpretation and explanation.
