## Questions &amp; Answers

1. Place the four images from the cell cycle in the correct chronological order.

- A. Image A, image D, image B, image C
- B. Image C, image D, image B, image A
- C. Image C, image B, image A, image D
- D. Image B, image C, image D, image A

**Correct Answer:** C. Image C, image B, image A, image D

Explanation: Image C shows the cell in interphase. The cell's DNA is in the form of chromatin. Image B shows the cell in prophase. The chromosomes have thickened and can be seen individually. Outside the nucleus, spindle fiber is beginning to form between the centrioles. Image A shows the cell in metaphase. The chromosomes have lined up along the equator of the cell and are attached to spindle fibers at their centromere. Image

Teaching and Learning Online Franklin S. Allaire, Jennifer E. Killham, 2023-01-01 Science is unique among the disciplines since it is inherently hands on. However, the hands on nature of science instruction also makes it uniquely challenging when teaching in virtual environments. How do we as science teachers deliver high quality experiences to secondary students in an online environment that leads to age grade level appropriate science content knowledge and literacy but also collaborative experiences in the inquiry process and the nature of science? The expansion of online environments for education poses logistical and pedagogical challenges for early childhood and elementary science teachers and early learners. Despite digital media becoming more available and ubiquitous and increases in online spaces for teaching and learning (Killham et al 2014, Wong et al 2018), PreK-12 teachers consistently report feeling underprepared or overwhelmed by online learning environments (Molnar et al 2021, Seaman et al 2018). This is coupled with persistent challenges related to elementary teachers' lack of confidence and low science teaching self-efficacy (Brigido, Borrachero, Bermejo, Gunning, Duran, Duran 2004). Ideal for undergraduate teacher candidates, graduate students, teacher educators, classroom teachers, parents, and administrators, this book addresses why and how teachers use online environments to teach science content and work with elementary students through a research-based foundation.

**Justice-Oriented Science Teaching and Learning** David Steele, Alison K. Mercier, 2025-02-21 This textbook provides K-12 science teachers and educators innovative uses of anchoring phenomenon-based teaching approaches from a justice-oriented lens (Morales, Doyle 2017). It discusses topics such as the use of anchoring phenomenon-based pedagogies, qualities of productive anchoring phenomena, and includes examples of unit plans that use anchoring phenomena and social justice science issues to create storylines to foster students' multiple pathways to knowing and learning in the science classrooms. The book is beneficial to K-12 science teachers and science educators who are interested in facilitating students' sense-making of a real-world phenomenon and engaging in three-dimensional science instruction (NGSS Lead States 2013). By providing examples of unit plans based on theoretical groundings of anchoring phenomenon-based instruction and justice-oriented science teaching, this book provides a great resource to students, professionals, teachers, and academics in science education.

**New Directions in Technological Pedagogical Content Knowledge Research** Dr. Myint Swe Khine, 2015-05-01 In the past decades, wide-ranging research on effective integration of technology in instruction has been conducted by various educators and researchers with the hope that the affordances of technology might be leveraged to improve the teaching and learning process. However, in order to put the technology in optimum use, knowledge about how and in what way technology can enhance the instruction is also essential. A number of theories and models have been proposed in harnessing the technology in everyday lessons. Among these attempts, Technological and Pedagogical Content Knowledge (TPACK) framework introduced by Mishra and Koehler has emerged as a representation of the complex relationships between technology, pedagogy, and content knowledge. The TPACK framework

extends the concept of Shulman's pedagogical content knowledge PCK which defines the need for knowledge about the content and pedagogical skills in teaching activities. Since then the framework has been embraced by the educational technology practitioners, instructional designers and educators. TPACK research received increasing attention from education and training community covering diverse range of subjects and academic disciplines and significant progress has been made in recent years. This book attempts to bring the practitioners and researchers to present current directions, trends and approaches, convey experience and findings and share reflection and vision to improve science teaching and learning with the use of TPACK framework. A wide array of topics will be covered in this book including applications in teacher training, designing courses, professional development and impact on learning, intervention strategies and other complex educational issues. Information contained in this book will provide knowledge growth and insights into effective educational strategies in integration of technology with the use of TPACK as a theoretical and developmental tool. The book will be of special interest to international readers including educators, teacher trainers, school administrators, curriculum designers, policy makers and researchers and complement the existing literature and published works. **Creating Project-Based STEM**

**Environments** Jennifer Wilhelm, Ronald Wilhelm, Merryn Cole, 2019-02-05. This book models project based environments that are intentionally designed around the United States Common Core State Standards CCSS 2010 for Mathematics, the Next Generation Science Standards NGSS Lead States 2013 for Science and the National Educational Technology Standards ISTE 2008. The primary purpose of this book is to reveal how middle school STEM classrooms can be purposefully designed for 21st Century learners and provide evidence regarding how situated learning experiences will result in more advanced learning. This Project Based Instruction PBI resource illustrates how to design and implement interdisciplinary project based units based on the REAL Realistic Explorations in Astronomical Learning Unit 1 and CREATES Chemical Reactions Engineered to Address Thermal Energy Situations Unit 2. The content of the book details these two PBI units with authentic student work, explanations and research behind each lesson including misconceptions students might hold regarding STEM content, pre/post research results of unit implementation with over 40 teachers and thousands of students. In addition to these two units, there are chapters describing how to design one's own research based PBI units incorporating teacher commentaries regarding strategies, obstacles overcome and successes as they designed and implemented their PBI units for the first time after learning how to create PBI STEM Environments the REAL way. *Science Units for Grades 9-12* Randy L. Bell, Joe Garofalo, 2005. Sample topics include cell division, virtual dissection, earthquake modeling, the Doppler Effect and more. *100 Brain-Friendly Lessons for Unforgettable Teaching and Learning (9-12)* Marcia L. Tate, 2019-07-24. Use research and brain based teaching to engage students and maximize learning. Lessons should be memorable and engaging. When they are, student achievement increases, behavior problems decrease and teaching and learning are fun.
