The Forest and the City Cecil C. Konijnendijk, 2018-03-12 Amsterdamse Bos Bois de Boulogne Epping Forest Hong Kong's country parks Stanley Park throughout history cities across the world have developed close relationships with nearby woodland areas In some cases cities have even developed and in some cases are promoting a distinct forest identity This book introduces the rich heritage of these city forests as cultural landscapes and shows that cities and forests can be mutually beneficial Essential reading for students and researchers interested in urban sustainability and urban forestry this book also has much wider appeal For with city forests playing an increasingly important role in local government sustainability programs it provides an important reference for those involved in urban planning and decision making public affairs and administration and even public health From providers of livelihoods to healthy recreational environments and from places of inspiration and learning to a source of conflict the book presents examples of city forests from around the world These cases clearly illustrate how the social and cultural development of towns and forests has often gone hand in hand They also reveal how better understanding of city forests as distinct cultural and social phenomena can help to strengthen synergies both between cities and forests and between urban society and nature

New Perspectives on People and Forests Eva Ritter, Dainis Dauksta, 2011-04-29 The aim of this book is to elucidate the role of forests as part of a landscape in the life of people Most landscapes today are cultural landscapes that are influenced by human activity and that in turn have a profound effect on our understanding of

and identification with a place The book proposes that a better understanding of the bond between people and forests as integrated part of a landscape may be helpful in landscape planning and may contribute to the discussion of changes in forest cover which has been motivated by land use changes rural development and the global climate debate To this end people s perception of forest landscapes the reasons for different perceptions and future perspectives are discussed Given the wide range of forest landscapes and cultural perspectives which exist across the world the book focuses on Europe as a test case to explore the various relationships between society culture forests and landscapes It looks at historical evidence of the impacts of people on forests and vice versa explores the current factors affecting people s physical and emotional comfort in forest landscapes and looks ahead to how changes in forest cover may alter the present relationships of people to forests Drawing together a diverse literature and combining the expertise of natural and social scientists this book will form a valuable reference for students and researchers working in the fields of landscape ecology and landscape architecture geography social science environmental psychology orenvironmental history It will also be of interest to researchers government agencies and practitioners with an interest in issues such as sustainable forest management sustainable tourism reserve management urban planning and environmental interpretation **Wood and Forest** William Noyes,1912
