**Microanalysis of Atmospheric Particles** Joseph M. Conny, Peter R. Buseck, 2024-12-24 Studying atmospheric particles from a microscopic perspective Most of what is visible in the atmosphere such as pollution dust haze fog and clouds is due to micrometer and nanometer sized aerosol particles It is important to understand the source characteristics and behavior of these small particles as they play a fundamental role in large scale atmospheric processes Microanalysis of Atmospheric Particles Techniques and Applications presents different microscopic techniques for studying aerosols and explores a range of applications in climate studies and air quality studies Volume highlights include Overview of different techniques and applications In depth descriptions of scanning electron microscopy transmission electron microscopy electron energy loss spectroscopy Raman microspectroscopy and atomic force microscopy Techniques for studying physical characteristics and chemical composition Methods to examine particle transformation Examples including soot organic aerosols ice crystals and sea spray Applications for global and regional climate change and urban air quality The American Geophysical Union promotes discovery in Earth and space science for the benefit of humanity Its publications disseminate scientific knowledge and provide resources for researchers students and professionals *Plant Silicon Interactions between Organisms and the Implications for Ecosystems* Julia Cooke, Jane L. DeGabriel, 2017-01-27 In this Frontiers topic we explore how the functions and fates of plant silicon interact with other organisms and ecosystem processes By bringing together new data from multiple disciplines and scales we present a cross section of novel explorations into how plants use silicon and the implications for agriculture and ecosystems Key aims in this field are to understand the determinants of plant silicon uptake and cycling and the benefits that silicon uptake confers on plants including reducing the impacts of stresses such as herbivory Current research explores inter specific interactions including co evolutionary relationships between plant silicon and animals particularly morphological adaptations behavioural responses and the potential for plant silicon to regulate mammal populations Another emerging area of research is understanding silicon fluxes in soils and vegetation communities and scaling this up to better understand the global silicon cycle New methods for measuring plant silicon are contributing to progress in this field Silicon could help plants mitigate some effects of climate change through alleviation of biotic and abiotic stress and silicon is a component of some carbon sinks Therefore understanding the role of plant silicon across ecological agricultural and biogeochemical disciplines is increasingly important in the context of global environmental change Journal of the Air & Waste Management Association ,2009 Fatigue of Sintered Materials Srečko Glodež, 2021-05-26 Powder Metallurgy PM is a general term which represents all techniques to produce solid metal based products from powders PM sintered components are used widely in the engineering practice particularly in the automotive industry When determining the load capacity of dynamically loaded machine parts and structures made of sintered materials the fatigue behaviour of critical areas should be considered including crack initiation and the crack propagation period In

this book the theoretical background of both PM technology for producing sintered parts and the fatigue phenomenon of dynamically loaded components are described in detail In the application part some aspects of the Fe and Al powder morphology and its influence on the basic characteristics of sintered products are analysed before the fatigue behaviour of diffusion alloyed Cu Ni Mo sintered steel is presented considering the additional heat treatment effects on the fatigue strength Furthermore the fatigue analysis of sintered gears is also investigated In that respect this book represents a significant contribution to the database of the fatigue phenomenon of sintered machine parts and structural components
